

## Herb Johnstone, Camrose, Wins Championship Flight Lacombe Golf Tournament

Defeats J. Gwilliam, Jr., 2 and 1, in Finals; Tom Lorimer, Gull Lake, Plays in Longest Single Match, 22 Holes; Weather Excellent

Ideal weather prevailed for the second day of the Lacombe golf tournament, which wound up Thursday last. The championship flight was won by Herb Johnstone of Camrose after a keenly contested battle with Jackie Gwilliam, Jr., of Coronation, Johnstone winning two and one. All finals were hard fought, several going into extra holes before the winner was decided. The longest game was in the second flight consolation, when Tom Lorimer of Aspen Beach carried Roy Kay of Edmonton to the 22nd green before losing out. In the First Flight consolation, the field narrowed down to the Nugent family, when A. Nugent of Camrose won from his Dad, B. Nugent, to carry off first honors in this section. The course was in splendid shape after the recent rains. Final results are as follows:

### All-Electric Kitchen To Be Demonstrated

Showing what the modern kitchen looks like will be demonstrations given by the Home Service staff of the Calgary Power Company, with its portable, all-electric kitchen, which will reach Lacombe today.

The practical demonstration will be in charge of several expert demonstrators, and will show advanced ideas in kitchen smartness, cookery ease, food economy and up-to-the-minute modern conveniences. Complete demonstrations in the form of cooking classes will take place in Lacombe for three days, August 5, 6 and 7, starting promptly at 2:30 p.m. and 8 p.m. each day. Products of the kitchen will be given away at door prizes to those in attendance.

Will Give Valuable Hints Modernization is the key-note in everything these days and housekeepers of the town and district will get many valuable pointers on the running of an up-to-date kitchen. The demonstrations are absolutely free and the public is cordially invited to take them in.

### Surprise Shower Held in Honor of Miss Evelyn Millard

A surprise shower was held at the home of Mr. and Mrs. Roy Millard in honor of their daughter Evelyn, who is to be married shortly. About forty guests assisted and the bride-to-be was the recipient of many useful gifts.

A mock wedding was held, the bride and groom acting as bride and groom. Lunch was then served.

### GOLFERS AT WETASKIWIN

TOURNAMENT SUNDAY Several Lacombe Golf Club members competed in the Wetaskiwin Golf Tournament held last week-end. Harry Teare and Ernie Salt both qualified for the championship consolation before losing out. Pete Danner, Clark and Miller qualified for the first flight, and all competed in the first flight consolation matches, where they lost out after some hard fought holes.

## Around the Town

H. F. Kohne of Dunlask, Sask., on a motor trip through Alberta, is a visitor in town. His daughter, Winnifred, is stricken with appendicitis and is a patient in the local hospital.

Arriving from Calgary last Friday, T. H. Donnelly has assumed charge of the local Pioneer Grain elevator. He has been a superintendent with the same company for the past seven years.

Mr. and Mrs. W. MacRobbie of Edmonton have been the guests of Mr. and Mrs. T. Wilks for the past few days.

Mr. and Mrs. D. Campbell and family motored from Calgary on Wednesday, accompanied by Mrs. D. Campbell, Sr., visiting with Mr. and Mrs. H. J. Ford. The latter is the mother of Mrs. Ford and will stay for an extended visit.

Mrs. Jack Ward and family left on Tuesday for Pandory, Alberta, where they will visit with her parents, Mr. and Mrs. J. Schirler, for a week.

The telephone number in the advertisement of the U.F.A. Central Co-operative Association appeared incorrectly last week. The correct number is Telephone 207.

Mr. J. F. Hunt of Deckerville, Michigan, visited with his sister, Mrs. E. Peers, last week-end. He is on a tour of Western Canada. His last visit here was in 1902.

Jack McCaughy and Don Wilks left last Saturday for Cranbrook, where they will visit with Don Sneath for a few days.

Mr. and Mrs. G. T. Jackson left early this week for the coast, where they will visit for a short time.

J. Stewart Fraser is leaving this week-end for a holiday at the coast.

### This Week's Thought

Rash, fruitless war, from wanton glory waged, is only splendid murder.

## Hail Storm and Wind Friday Does Considerable Damage

Crops Suffer 100% Loss in Districts; Barns Destroyed By Strong Wind

Rain and hail, accompanied by a strong gale which reached cyclonic fury in some localities, swept through Lacombe and district last Friday, damaging crops and buildings. Losses in crops of from 100% have been reported.

On W. J. Smith's farm, one mile east and one-half mile north of town, the roof was lifted off the barn, chickens killed and trees snapped off and pulled up by the roots. The wind was so strong a hay rack was lifted 100 feet through the air and crashed against a wagon box. Windows were broken in the house, and gardens and crops completely destroyed. Crops seeded by Robert Peterson, B. G. McLeod, Al Tolbot and Tom Roberts in this vicinity were totally destroyed, heaped into the ground by the hail storm.

The barn on the Nets Flewelling farm, two miles south of Smith's farm, was destroyed, the roof lifted off and the cement foundation cracked.

Morningside District In the Morningside district, hail, accompanied by the terrific gale, struck hard to completely destroy several crops in that district. At the farm of Chester Carter, barn buildings were moved off their foundation by the fury of the wind, crops were totally destroyed and considerable damage done. Crops seeded by Albert Hall, Tom Rodney, John Hall, John Pennington, Geo. Swanson and others in that district suffered 100% loss.

South of Lacombe, little damage was done. In conversation with O. W. Hueppel, near the Globe learned that scarcely 5% damage was caused by hail. Bill Parker, west of town, little damage done in that direction.

The storm came in two phases and it is claimed the second storm was the one which did the most damage. Bashaw received the brunt of hail and wind, and damage in that section is claimed to be 100%. The Blindman Valley east also came under considerable damage, according to reports received.

Other Losses in Lacombe Other farmers in the Lacombe district whose hail losses run up close to the 100% mark are: R. Robit, W. Hueppel, J. Hill, H. Gale and J. Lande.

From our Clive correspondent, word has been received that E. W. Bell, a two-stable householder, was blown off by the gale. The large chimney was blown off W. J. Morrice's house nearly 5 p.m. During the storm, several other houses were also blown away and badly damaged.

Apparently the fringe of the storm hit Lacombe as very little hail fell, but the wind was very strong, accompanied by a heavy rain.

### Crown Ratepayers Seek Hospitalization At Red Deer

A by-law, which was introduced and read for the first time in the meeting of the Municipality, called for the hospitalization of all residents within the Municipality, who have no desire to be included in the Lacombe and District Community Hospital scheme.

Notices have been posted throughout that part of the Municipality, and unless a petition, asking for inclusion in the Lacombe Hospital scheme, is received within thirty days, bearing the signatures of 15 per cent of the ratepayers, the south side of the Blindman Valley, the agreement between the Municipality of Crown and the Red Deer Hospital will be null and void.

Dr. George D. Misenor of Edmonton spent Sunday with his mother, Mrs. E. L. Misenor.

Mrs. George Theriault left on Saturday to visit relatives in Leduc and Edmonton.

Miss Freda Simpkins left last week for an extended trip to the Old Country.

W. Laurie Chisholm left last week-end to take a position in the laboratory of the University Hospital.

Mr. and Mrs. Jack Clark left last week-end for Calgary, where they will visit for two weeks.

Don Scott has returned from Edmonton, where he has been visiting relatives.

The Misses Maxine Fitzpatrick and Jessie Hay left over the week-end for a one-month holiday in Seattle, Vancouver and other coastal points.

Mr. and Mrs. Gordon Brown and daughter Shirley are spending two weeks' vacation at Sylvan Lake.

Miss Margaret Masters spent the week-end in Calgary.

Miss Clare Powell, L.R.A.M.C., principal of the Alberta Conservatoire, Calgary, is the guest of Rev. and Mrs. W. E. Herbert.

Misses Margaret Fischer and Jennie Schirler visited at the home of Mr. and Mrs. Fischer, of Ponoka, over the week-end.

### Scores at Bisley

Over one hundred dollars worth of damage was done to L. P. Minkler's car, which was stolen from his garage Tuesday night of last week.

Investigation started, with the result that it was discovered 12 gallons of gasoline had been taken from a Blackfalds garage, and 45 pairs of shoes, some shirts and other goods stolen from Simpson Bros.

## Hospital Board Receives Tenders For New Hospital

Bid Tended by Poole Construction Company Approved By Board

Tenders for the Lacombe and District Community Hospital were received with at a regular meeting of the Hospital Board held Tuesday night in the Town Office. The bid tendered by the Poole Construction Company, Edmonton, was the lowest, totalling \$27,785, with an additional \$149 for alternative floor finishings. A motion that the tender of the Poole Construction Company be approved was passed.

Other tenders received by the board were:

W. Dorosh, Edmonton, \$28,500.  
T. Ingram, Edmonton, \$30,454.  
C. C. Batten, Edmonton, \$27,900.

Thos. Nesbitt, Edmonton, \$28,758.  
Coulson Construction Co., and A. R. Winkler, Ponoka, \$29,200.

Robert McEwan, Edmonton, \$28,120.  
Otto Link, Edmonton, \$30,300.  
Bennett & White, Calgary, \$30,978.  
J. A. Buchanan, Edmonton, \$28,985.

## Wind and Rain Storm Interferes With Lacombe Fair Friday Afternoon

Livestock Exhibits Excellent; All Sports Called Off Because of Weather; Two Good Performances Given in Pavilion

Rain, hail and wind dampened the enthusiasm of even the "die-hard" at the Exhibition Grounds last Friday, where the forty-second annual Lacombe Fair was being held. Tents on the midway were blown in and canvas ripped, stands and concessions hoveled over by the terrific wind, and attendants and crowd soaked by the heavy downpour of rain when the storm broke about 4 o'clock in the afternoon.

Sports and baseball games, as scheduled, were of necessity called off. The Imperial Shows, whose tents appeared on the midway, after struggling gamely to repair the damage caused by the first deluge of rain and wind, started to re-erect their equipment when another storm, scarcely less violent than the first, unfolded at their hard work.

The show in the Pavilion, however, where Harry Hutteroff presented his "1937 Variety Highlights," appeared twice as advertised, and the two performances were every-thing said for them and proved top-notch attractions. The bill carried a little of everything and was popular with both audiences.

Dave Carswell, with his beautiful tenor voice, made a big hit, and his versatility was prominent when he took the part of the rube in "The Girl on the Bench," a comedy skit, which brought peals of laughter.

Vally Bralley, with his marionette, gave a wonderful exhibition of the music and speed which can be obtained from that instrument. His rendition of "The Roaring" and "The Tale of a Plent" was a treat to all music lovers.

Plenty of Comedy The comedy gags pulled by Harry Hutteroff and his associates were laughingly funny, especially the one entitled "No Haven," which made a big hit.

Other dancing, impersonation and singing numbers were also enjoyed. The highlight, however, was the final act of the Rush Link Toy Band, which was bewilderment to the audience by producing live pigs from nowhere and making them disappear just as quickly. Other music acts also baffled the onlookers.

Over 600 attended the afternoon show, but attendance at night was disappointing. It was worthy of better support from the townspeople.

Dance Well Attended The big dance, held immediately after the night show, was well attended, over two hundred paying admissions and enjoyed the music provided by the six-piece Rocky Mountain Ringers' Orchestra.

Brathwaite's portable loud speaker did yeoman service in broadcasting admissions and keeping the grounds alive with music. Livestock judging was done under sunny skies, but the livestock parade was called off because of weather. Results of the livestock judging were as follows:

Horse Division CLYDESDALES Stallion, 1 year and under 2—No first; 2, P. G. Morrison.

Stallion, 2 years and under 3—1, P. G. Morrison; 2, Alex Milne; 3, W. E. Stewart.

Brood Mare, in foal or foal at side—1, W. McDonald; 2, Alex Milne; 3, P. G. Morrison.

Foal, 1937—1, W. McDonald; 2, Alex Milne; 3, P. G. Morrison.

Filly, 1 year and under 2—1, Alex Milne.

Filly, 2 years and under 3—1, Alex Milne; 2, P. G. Morrison; 3, W. E. Stewart.

Champion Stallion—P. G. Morrison.

Champion Mare—Alex Milne.

PERCHERONS Stallion, 3 years and over—1, Lyle Brown, Red Deer.

(Continued On Page Four)

Several New Homes Being Erected Here Private building in Lacombe has taken a boost this year, with several dwellings being built in different sections of the town.

Five houses either are erected or about to be built on Hamilton avenue west. Ted Danner and A. Korschner have each built small dwellings in this part of town, and Mrs. M. L. Waters is about to build one.

Hal D. Laird has bought two lots on the same street for the purpose of building two houses. Mrs. Ramsay has purchased a lot to the east of the site of the new hospital, on which she is going to build. A. Bruns' home, next door to Matt Peterson's residence, is nearing completion.

Do You Remember-- 'Way Back When? (From The Minutes of the Town Councils)

30 YEARS AGO—AUGUST, 1907. Fred Lister was appointed Town Constable to fill the vacancy left by the resignation of R. C. Webster.

A recommendation by the Water and Light Committee "that an arch be placed on the corner of Day Street and Barnett Avenue on or about October 1, 1907, was adopted by the council.

25 YEARS AGO—AUGUST, 1912. A motion by Councillor Jesse Fraser, seconded by Councillor F. E. McLeod, "that this council co-operate with the Board of Trade to secure the gravelling of the Gull Lake road, and take road and gravel to be used on the Gull Lake road, was passed.

A further motion that the gravelling be allowed to use gravel from the Town Gravel Pit at a cost of \$1.00 per cubic yard to be used on the Gull Lake road, was passed.

### Old-Timers' Re-Union Held Friday

Close to Fifty Members Visit Rooms in Central Alberta Pavilion

Close to 50 members of the Old-Timers' Association gathered at the Re-union held in the Central Alberta Pavilion Friday in conjunction with the Lacombe Fair. Old-timers dropped into the pleasantly decorated rooms regularly throughout the afternoon, to inspect the pictures of early days which adorned the walls and to talk over the happenings of "the good old days."

Members of the association registering, along with the dates they arrived in Alberta, were:

Lyle E. Brown, 1899; Pat Butlin, 1881; Henry J. Gale, 1891; Richard S. Holton, 1906.

W. F. Puffer, 1890; A. J. Dalzell, 1886; Robert Dalzell, 1890; Jesse Fraser, 1888; Chester Carter, 1893.

J. F. Fay, 1901; Mrs. O. Burrows, 1894; D. McLean, 1898; Margaret R. McLean, 1907; R. Krause, 1898.

M. J. Morrison, 1900; E. Owen, 1892; Mrs. Walter Butlin, 1906; E. Willson, 1900; Mrs. A. E. Willson, 1900; Mr. and Mrs. S. P. Piffman, 1906; Mr. and Mrs. E. Ogilvie, 1888.

W. Groom, 1884; Roy Hoppa, 1900; James McKay, 1900; N. L. Butlin, 1889; C. Norris, 1893.

Lee Maddox, 1912; Amanda Grant, 1898; H. F. Flewelling, 1892; Ralph Mowbray, 1903; F. R. Winslow, 1907.

Mrs. George Duffy, 1918; Mrs. George Chiswell, 1918; F. G. Langrock, 1905; Fred Moore, 1900; Matt Hogg, 1900.

W. Pearson, 1909; Val Redd, 1900; Alex J. Leslie, 1901; William Henth, 1903; R. Pethbridge, 1906; James Gordon, 1906; E. G. Todd, 1906; R. N. Longstreet, 1900; Mrs. W. Bough, 1892.

Tees Sports Day, Held July 28th, Considered Successful

(From Our Tees Correspondent) TEES.—The Sports Day and Picnic held July 28 was considered a financial success. Every sport went off pretty well on schedule, except one ball game. Westling could not get a team to field as some other team had already called on their reserves.

Sageant handball team took all the prizes, first placing Tees and defeating them 14-0 and later in the day defeating Nebraska 6-4.

Alta girls' softball team defeated the Tees girls 12-0 in the softball fixture and Tees defeated Nebraska in the tug-of-war.

1500 races, which were numerous, were won by many, no record being kept or times checked. The horse-shoe contest went up and down from top to toe and the annual winners were never announced.

### Temperatures

(Lacombe Exp. Station)		Max.	Min.
July 29	42 rain	69	59
30	42 rain	70	62
31	31 rain	58	44
Aug. 1	41 rain	52	45
2	32 rain	73	49
3	32 rain	82	44
4	32 rain	86	52

## A Great Menace

The automobile speed artist is a great menace on the highways but he is not the greatest source of danger to the lives and limbs of other users of the open roads.

The man who drives at night with one light ablaze and the other extinguished perhaps appears to be the most dangerous of the highway, not only to himself and other occupants of the car he is piloting but to other drivers and the occupants of their automobiles. Certainly as a potential destroyer he ranks only second to the driver with liquor-laden breath.

The one-light driver is dangerous to the drivers and occupants of other cars whom he meets travelling in the opposite direction, because the "safety" driver is unable to tell whether the single light is on the right or the left side of the approaching car. If it happens to be the left side light that is burning the driver meeting him may be fooled and make insufficient allowance for clearance. The result is a terrific crash, serious injuries and perhaps death.

The natural instinct of the "safety" driver meeting a one-light car is to give the other fellow as wide a berth as possible, because of the uncertainty as to which side of the approaching car is lighted. But here, too, there is a risk that he may plunge into the ditch in his efforts to ensure adequate clearance.

Under any conditions the one-light driver is a danger to others as well as to himself, but particularly in this case when cars travelling in the same direction are passing one another with a single-lamp car approaching in the opposite direction.

Distances at night time are deceptive, even to the most experienced drivers. When both lights are burning it is not too easy to gauge the distance and speed of an approaching car. To many drivers the oncoming car from the opposite direction may appear a considerable distance away whereas it is actually close at hand and vice versa.

The only guide that one has as to distance and the speed of an automobile approaching at night time is the apparent distance between the two lamps and the rapidity with which this distance diverges as the car approaches.

At a considerable distance away the two lights of the approaching car appear to be practically merged into one. Observing this, the "safety" driver perceives that he has plenty of time to pass a car in front of him proceeding in the same direction and pull back on to the right side of the road before the car travelling in the opposite direction passes.

But, if instead of the approaching car being an automobile with two lights showing at a considerable distance away, it is a car with only one lamp ignited close by and approaching at speed, the drivers and occupants of three cars are in deadly peril and through no fault of any person except the operator of the one-light car.

It is probably doubtful whether the operator of a one-light car has any conception of the risks he runs and of the peril that he is to other night travellers on the highway, or he would surely not embark on such a mad enterprise without first seeing to it that both lamps are in good working order.

If he does appreciate the risks that his defective lighting system entails and knows of their condition, then he can only be regarded as guilty of gross and culpable recklessness and should be dealt with in the light of such an indictment.

There are occasions, no doubt, when one of a pair of headlights will become extinguished through a globe burning out, a short circuit or some other defect which has developed after the night journey has commenced. Under those circumstances the operator cannot be held as culpable as the driver who fares forth on a trip, knowing in advance that he can show only one light and who does not remedy the defect before darkness sets in. Even the former, however, if he is as alert as he should be, should be able to perceive by the appearance of the beam on the road ahead of him that one of his lamps is not giving service.

The man with the glaring headlights on his car is a dangerous driver but the driver only showing one light is a still greater menace and the man who knowingly drives on the highway with only one lamp burning should be brought to book on every possible occasion and dealt with without compunction.

Such cases should be reported to the authorities by all travellers on the highway who have occasion to come in contact with them or to observe them and the law should be allowed to take its course without let or hindrance.

Until the driving public fully appreciate the seriousness of the offence and report every infraction which comes to their attention, the one-light driver will continue gaily on his way with death at his elbow ready to claim him and those whom he meets.

### Chickens Are Excepted

Motorists in United States Not Held For Striking Them

The privilege of a chicken to delay to the last minute its decision as to whether it will cross a road ahead of an automobile is considerably abridged in the State of New York by a bill amending the vehicle and traffic law which Governor Herbert H. Lehman has just signed. It amends the law under which a motorist could be held for striking or killing a chicken or any domestic animal.

The amended law requires a motorist whose car has struck a horse, a dog or any one of several animals classified as cattle, to report to the owner of the animal or to the police or a judicial officer, exhibiting his license and giving his name and address. In such cases an arrest may be made without a warrant. Chickens, however, are excepted—Charlotte Guardian.

### Death Dealing Chemicals

Have Retarded Genuine Research For Past Twenty Years

A research scientist with his eyes fixed on the dollar sign rather than on alleviation of suffering can find the quickest and easiest road to wealth by seeking employment from governments as an inventor of deadly gases and other death-dealing agencies, declared Professor Antoine Lacaze, assistant director of the Radium Institute of Paris, at Ottawa. Professor Lacaze, who collaborated with Madame Curie, discovered radium, was in Ottawa to address the joint conference of the Canadian Medical Association and the Ontario Medical Association. The Great War may have increased man's knowledge of death-dealing chemicals and apparatus, Professor Lacaze declared, but it retarded genuine, medical research by almost a decade.

Early lamp-wicks were made of dried reeds or moss. In succeeding centuries they were made of flax or silk.

Skeletons of sea creatures often are found in sections of the Himalaya mountains.

Whales are the largest of all mammals.

## WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 5 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

### A Studious Nation

Chinese Pupils in Canada Usually Near Top of Class

Teachers almost unanimously agree that Chinese pupils in our schools are exceedingly apt, clever and progressive. This applies from primary class to the university, although so far as the former are concerned much depends on all other callings, and parents make great sacrifices to further the learning of a promising member of the family.

In whatever branch of science the Chinese are studying, their names are always among the head of the class when the results come out. They are a much misjudged people in this country because as a rule the laundering and cafe class do not come from the educated families, but if caught young they may be made into worthy material.

The late Lord Northcliffe, British newspaper magnate, who travelled extensively, stated that of all the people he met the educated Chinese were more like the English than any other. Occidentals who have lived in China speak most highly of the intelligent Chinese and leave the country with regret. The Chinese of the upper classes send their sons and daughters to universities all over the world.

The two sisters of Dr. Toob Hsieh, of Boston, and well-known in Ontario, himself a great scholar, were educated at Aberdeen University. One of them subsequently became a professor of chemistry in the University of Toronto. The equivalent would be for a Canadian student to learn Chinese, take a degree in chemistry at a Chinese university, then go and teach the science in Spanish. The prospect of doing this appeals to the stoutest Canadian heart—St. Thomas Times-Journal.

### Whirligig Of Science

Discover A New Principle In The Nature Of Diseases

Discovery at the Rockefeller Institute for medical research that viruses which cause disease can be made to "fall apart" and become harmless was reported at Denver.

The discovery was made with the new whirligig of science, the ultracentrifuge, which extracts into plain view disease viruses which heretofore couldn't be seen with microscopes.

It discloses a new principle of the nature of disease. It was reported to the American Association for the Advancement of Science by Dr. G. Wyckoff, of the institute's Princeton laboratory.

The whirligig is a steel top, two or three inches in diameter, spinning on a cushion of compressed air. It whirls speeds up to 50,000 revolutions per minute.

This speed, also supplied by compressed air, subjects anything placed inside the top to a force several thousand times the pull of gravity. Since the pull is greater for heavier particles and less for the lighter ones, the heavier ones are thrown out farther and each kind may be seen separately.

A light that flashes each time the top revolves—50,000 times a minute—of the ultracentrifuge is running at that speed—illuminates the "sample" in the top and makes it appear to be standing still. This scientists can examine the separated particles while the top is in motion.

Kub' I am convinced that our baby looks like me. Rattigan: I wanted to say the same thing, but I was afraid you would be offended.

Those new indestructible playing cards can be shuffled and dealt 18,000 times without showing the least sign of wear.

The least expensive camera for the amateur photographer is the box or fixed-focus type. The most expensive is the reflex type.

A poor man has to spend money in order to prove that he has it; a rich man doesn't.

### Sir Eric Geddes

The Chairman of Imperial Airways Dies In England

Sir Eric Geddes, chairman of Imperial Airways and of the Dunlop Rubber Company, died at his home in Sussex recently, at the age of 61. He was first lord of the admiralty during the closing years of the Great War and a brother of Sir Auckland Geddes, former ambassador to the United States.

Geddes, as chairman of Imperial Airways, had been engaged with plans for inaugurating trans-Atlantic service until his recent illness. His death came less than two weeks before the scheduled start of the experimental flights by his company and Pan-American Airways.

A business man, discovered by Lloyd George for war service, he passed with rapidity through a succession of high positions and was one of the driving forces behind the country's war effort.

His first war post was deputy director-general of the munitions supply. In 1916 he was appointed director of general transportation for the British forces in France and was shortly recalled to England as director-general of military railways and inspector-general of transportation in all theatres of the war.

Entering parliament in 1917 as Conservative member for Cambridge University, Sir Eric became first lord of the admiralty, remaining at that post until 1918. He was later minister of transport.

### Nothing In Idea

That Feather Bed Affords Protection From Lightning

The U.S. Weather Bureau has spotted that snug sense of security afforded by a feather bed—and covers well over the head—in a summer thunder storm.

But Dr. W. H. Humphreys, the bureau's expert on atmospheric electricity, offered a couple of gilt-edged substitutes:

A room with all-metal roof, walls and floor.

The bottom of a railroad cut. A recumbent position in most any ditch is good, he said, and a steel frame building is nearly as safe as the all-metal room.

Any house is better than an open field, but a tree is dangerous company when the celestial fireworks are lighting.

The most harmless kind of lightning, Dr. Humphreys said, is the famed "ball lightning."

### 400,000 Miles Of Highway

Canada Offers Unrivalled Facilities For Tourist Travel

Canada is a "travel wealthy" country, having over 1,200,000 motor vehicles—one for every nine inhabitants. Canada has 400,000 miles of highways, and in addition to her own heavy motor traffic, an ever greater, motorcade of more than four million automobiles from other countries travelled over the Dominion's highway systems during 1936.

Indulgent nature has given Canada a wealth of travel attractions—the scenic beauty of the Maritimes, the world-famed Niagara, the grandeur of the Rockies, the open spaces and wheat fields of the prairies, the last province there are countless lakes, rivers and forests providing unrivalled facilities for fishing, hunting, and summer and winter sports.

### New Coffee Bonfires

Brazil Has 11 Million Sacks From Last Year's Crop

In the last six years Brazil has lighted the skies turning 45 million sacks, or 2,970,000 tons, of coffee, which is as much as the nation exports in three years and as much as the world can consume in two years, the latter Digest reports.

New coffee bonfires will soon start burning because Brazilians have a carry-over of approximately 11 million sacks from last year, which will be added to an estimated coming crop of 26 million sacks. Of this potential 37 million sacks of coffee, Brazil can export only 15½ million sacks.

The magazine points out that even if Brazil which fills two-thirds of the world's coffee cups, destroys as much as it exports the nation's production still will have exceeded its demand—Kansas City Times.

### Purchase Planes

Seven Planes Ordered By Trans-Canada Air Lines

Lockheed Aircraft Corporation officials said they had received an order from Trans-Canada Air Lines, government controlled project which proposes to operate a mail and passenger service across Canada, for seven planes costing approximately \$4,000.

Four of the planes ordered were "14-type" and three Lockheed Electras and were reported to be used on the Vancouver to Halifax service.

### No Substitute Found

The wooden crate, under railroad tracks, is believed to be one kind of industrial equipment for which a satisfactory substitute never has been developed. During the past 50 years more than 2,500 patents on other kinds of ties have been issued but not one of them has been adopted.

**HAPPY ROLLINGS!**

When you touch a light to a cigarette you've rolled with Ogden's Fine Cut, you'll "contact" a smoother, sweeter smoke. Then you'll "take-off" for fullest smoking enjoyment, with the cigarette tobacco that pilots you to new heights of satisfaction. To be doubly sure of happy rollings, use the best papers, "Chantecleer" or "Vogue".

There's a bigger 15c. package of Ogden's now!

P.S.—Your pipe knows Ogden's Cut Plug.

**OGDEN'S FINE CUT**

### Rules Over Island

South African Pays Small Sum Yearly To Cover Lease

"Who would like to be king of a pleasant island set in sub-tropical seas... Lord of all he surveys down to the sands which are lapped by waves breaking in from the Pacific Ocean?" asks a writer in the Johannesburg Star. "And with the price of his throne only six pounds a year?"

There is a South African who has achieved this. His name is Walter de la Rive. He is a writer in the Johannesburg Star. "And with the price of his throne only six pounds a year?"

There is a South African who has achieved this. His name is Walter de la Rive. He is a writer in the Johannesburg Star. "And with the price of his throne only six pounds a year?"

### An Important Discovery

Glass Drinking Horns Used By Saxons 1,400 Years Ago

Glass drinking horns which were filled with mead to make the Saxon thirst about 1,400 years ago have been unearthed in a sandpit between Rainham and Upminster, Essex, England.

Ge T. Carter, a Romford archaeologist, who found the decorated curved horns, also unearthed relics of the stone, bronze and iron ages.

Some of them are on exhibition at the British Museum, where an official described them as "sensational."

"The horns are the finest ever found in this country," Mr. Carter said.

"The discoveries are so important because they show that this tract of marsh and forest in South Essex has been in almost continuous human occupation."

"Hitherto there has been no evidence of Saxon life on the north bank of the Thames, and it was believed that the Britons held the north side of the estuary."

Wash four quarts of cucumbers and cut in generous pieces. Cover with strong brine for three days (½ cup salt to 1 quart water); drain. Lay stand in clear water for three days. Change the water daily. Drain; simmer in weak vinegar for three hours. Add a piece of alum the size of walnut after the first hour. Drain; put cucumbers in a crock. Make a syrup of:

3 pts. white wine vinegar  
3 lbs. brown sugar  
2 lb. can Crown Brand Corn Syrup  
1 oz. whole allspice  
1 oz. whole cinnamon  
1 oz. celery seed

Pour the boiling syrup over the pickles and let stand for 24 hours. Drain; again bring syrup to boil and pour over pickles. Repeat for three consecutive days in all. Seal in sterile jars or use from the crock. Makes 6 pints.

### Enlarge Panama Canal

Plans Drafted For Work That Will Require Ten Years To Complete

Panama canal officials disclosed preliminary plans are being drafted to enlarge the "big ditch" at an estimated cost of \$150,000,000. A big canal, they said, will be necessary to take care of an expected increase in traffic.

It was emphasized that work on the canal would probably take 10 years. Another 10 years would be devoted to construction, and the proposed new locks would not be in operation before 1960. Installation of the new locks would cost approximately \$150,000,000.

### A Real Paradise

People suffering from hay-fever or catarrh, may combine pleasure with relief, by visiting the tiny island of Heligoland, in the North Sea, near the mouths of the Elbe and Weser Rivers. It is a mezzanine paradise. Already a popular summer resort, it has recently drawn a congress of bronchial experts.

Sound travels 1,100 feet a second; when sent by wireless it takes the speed of electric waves, 186,000 feet a second.

There are 1,100 kinds of animals and insects in the world, with thousands of varieties of each, it is estimated.

On clear days, the cathedral of St. Isaac, in Leningrad can be seen from the Gulf of Finland, 20 miles distant.

### Annual Payment Due

Sixty Thousand Canadian Indians Will Get Treaty Money

Officials of the Indian Affairs branch of the department of mines and resources, travelling by air, canoe and on foot, will leave shortly for the isolated districts of Northern Canada for the annual distribution of treaty money to the Indians.

Absoriginal settlers who have been ceding their rights to the Dominion as frontiers push northward during the past 60 years, receive an annual gift of \$4 per head, and collection of this money is the big event of the year among the Indians.

Treaty Indians are found in parts of Ontario, and in Alberta, Saskatchewan, Manitoba, and the Northwest Territories but there are none in Quebec, the Maritime Provinces or British Columbia. They are those who themselves signed away their aboriginal rights to territory or direct descendants of treaty signers. Children of Indians marrying whites are not eligible.

There are about 112,000 Indians in Canada, and approximately 60,000 receive the \$4 per head treaty money annually. The Indian population is slowly increasing.

There are about 112,000 Indians in Canada, and approximately 60,000 receive the \$4 per head treaty money annually. The Indian population is slowly increasing.

### Cannot Supply Demand

Telephones Scarce In Japan So People Buy Them

There is a telephone shortage in Japan, the only country in the world where subscribers have to "buy" their telephones instead of renting them.

Every year the ministry of communications offers a certain number of telephones for sale. This year 55,000 were offered to the public and 78,549 applications were received.

The post office accepts ordinary applications for a telephone, but there is such a long waiting list that it may not be installed for years. So telephones are bought and sold through brokers at a high premium.

### Scenery Can Be Enjoyed

View In Australia Is Not Blocked By Billboards

When Australians go motoring they can take in whatever scenery is handy without having their view blocked by billboards. In the state of Victoria alone, not a billboard is to be seen on 10,000 miles of highway. W. T. B. McCormack, chairman of the state's country roads board, said he has just completed a month's study of western Canadian and United States road systems.

What can be more satisfying, asks a writer, than putting in a hard day's work in the garden? Not putting in a hard day's work in the garden.

Some people find as much pleasure in whining about their misfortunes as other do in boasting of their good luck.

In Japan the aikrowm furnishes whole or partial livelihood for at least 18,000,000 people.

There are records of eagles living 100 years.

### for BITES

Insect, snake, or animal bites. Minard's is the only one of its kind. It draws out the poison.

**MINARD'S "KING OF PAIN" LINIMENT**

## To Maintain Fertility Of Western Soils The Use Of Fertilizers Will Be Needed

The initial fertility of the western prairie soils has been demonstrated many times by high yields of high quality wheat. The high yields have been more or less maintained in certain districts, while in others there has been a gradual decrease in yield which cannot be entirely attributed to a lack of moisture or competition from weeds.

The essential elements which the plants take from the soil in the largest quantities are nitrogen, phosphorus, calcium, magnesium, potassium, and sulphur. The other essential elements which are derived from the soil are generally present in amounts far in excess of the plants' needs. Plant growth, however, is not dependent on the total amount present, for the plant roots can absorb only the material dissolved in the soil moisture. Because of this fact, the productivity of a soil cannot be accurately gauged by the total amount of the essential elements present. Climatic and biological factors play an important role in changing the soil constituents from an unavailable to a soluble form.

The low precipitation of the prairie areas has prevented the loss, by leaching, of appreciable quantities of soluble salts. As a result, we find that the prairie soils contain large reserves of calcium, potassium, magnesium, and sulphur. It is doubtful if the application of these elements would have any beneficial effect on crop yields at the present time.

The nitrogen content of a soil is dependent on the amount of organic matter present. This is in turn influenced by climatic conditions and vegetative cover. The low precipitation of the prairie areas has not promoted a rank vegetative growth, with the result that the soils are rather low in organic matter and nitrogen. These substances are found close to the surface, owing to the shallow root systems of the prairie grasses. The loss of surface soil by drifting often results in serious damage to the fertility of the land, because the upper layers contain the major portion of the nitrogen.

Phosphorus is more evenly distributed than nitrogen at the different depths in the soil. There is a certain amount of variation, for the soil layers containing the most organic matter also contain the most phosphorus, as the plant roots absorb phosphorus at various depths and concentrate it in the plant. When the plant dies, this material is deposited on the surface where it accumulates or is carried into the soil after decomposition takes place. Phosphorus is not required in very large amounts by the cereals, but as it generally occurs in the form that is only slightly soluble, the plant may have difficulty in securing an adequate amount for maximum development, even when the soil contains a comparatively high concentration. A deficiency of any one of the essential elements will have a very pronounced effect on plant growth, even when the other essential elements are present in adequate concentrations.

The heavier soils generally contain more nitrogen and phosphorus than the lighter soils. This fact is reflected in the greater productivity of the clay and clay loam soils when compared with the light sandy soils in areas of equal precipitation.

The use of commercial fertilizers on the prairie soils has gradually increased during the past few years. This is to be expected, for agricultural history shows that any land which is cropped more or less continuously, eventually reaches a condition when fertilizers are needed. The initial fertility of the prairie soils has prolonged the period during which the application of fertilizers was not economical. Years of low rainfall and low yield have also tended to conserve the supply of plant nutrients. During a year of adequate or high rainfall, the prairie soils that have been cropped for 20 years or more would likely give an increased yield if supplied with an additional amount of nitrogen and phosphorus. During the drier years, it is doubtful if such would be the case, for there might not be sufficient moisture to carry any increased plant growth.

It is logical to expect that as time goes on and the amount of available plant food in the soil gradually becomes less, the use of fertilizers will become more general. The prairie soils, though having a high initial productive capacity, are not inexhaustible, and if farmed continuously will eventually need applications of plant nutrients in some form if profitable crops are to be produced.

**Made Right Start**  
A golfer was driving out about a foot in front of the teeing mark. The club secretary happened to come along.  
"Here!" he cried indignantly. "You can't do that! You're disqualified."  
"What for?" demanded the player. "You're driving off in front of the mark."  
The player looked at him with pity. "Away with you!" he said tersely. "I'm playing my third stroke!"

The dictionary will not approve of it, of course, but why not spell it "government," asks the Kitchen Record.

### Home Canned Berries

Raw Canning Method Can Be Used Successfully

As the berry season advances, the housewife is all anticipation, for there is nothing more satisfying to her than the knowledge that in this good berry year there will be a fine array of different kinds of berries on her well stocked pantry shelf of home-canned fruit and vegetables. The berry family is an efficient source of vitamins. Blackberries contain vitamin A, which is essential to the growth of youth, and currants, gooseberries, and raspberries are excellent sources of vitamin C which prevents scurvy.

No equipment for canning is necessary other than that found in the ordinary kitchen—sharp knives (preferably of stainless steel), a colander, bowls, measuring cups, enamel plates, wooden spoons, a wide-mouthed funnel for filling jars, and a jar lifter to save burned fingers when taking jars from the sterilizer. The sterilizer itself may be the common wash boiler, the steam pressure cooker, or the oven. Strawberries, raspberries, and rhubarb may be canned successfully by what is known as the raw canning method. Pack in jars; cover with boiling syrup; place on newspaper in a tub and pour boiling water into the tub to cover the jars three inches over the top. Place a blanket or rug over the tub and leave until cold. In pouring the boiling water into the tub, care should be taken not to pour directly on the jars.

In the process of sterilizing the berries, there is a choice of one of four methods, namely, hot water bath at 212 degrees Fahrenheit; steam pressure of five pounds; oven, or steam cooker. For blackberries and blueberries the time is 30 minutes in the hot bath; or ten minutes of 5-lb. steam pressure; or 35 minutes in the oven at 275 degrees Fahrenheit; or 30 minutes in the steam cooker. Gooseberries require 16 minutes in the hot water bath; or 10 minutes steam pressure or 30 minutes in the oven, or 25 minutes in the steam cooker. The same times apply to raspberries, and strawberries require 35 minutes in the oven.

Full instructions as to the canning of fruits and vegetables will be found in the household bulletin "Canning Fruits and Vegetables" which may be obtained free on application from the Dominion Department of Agriculture, Ottawa.

### Descendant Of Confucius

Chinese Girl Says Orient Is Adopting Western Customs

Miss Rosamunde Kung, direct descendant of Confucius, rugged, European-dressed, is in London from China. Her father is Minister of Finance, Vice-President of the Executive Yuan.

Her lovely suite at Grosvenor House is heavy with oriental perfume. Miss Kung looks like a delicate Chinese doll, talks like the college-bred girl, and to the minute American collegiate that she is.

She said to me: "I love London. For once, in the Western civilization, I've found something that compares with Old China, the China which emphasized background and good breeding and respect."

"Shanghai is a daring mixture of Eastern and Western customs. The girls go in for law, medicine, aviation, banking and politics. I love politics."—London Sunday Pictorial.

### Duty Free Goods

**Hundred Dollars Worth Must Be In Baggage**  
While Canadians spending a couple of days or more in the States are permitted to bring back (for personal or household use only) a hundred dollars worth of goods duty free, these must be "included in the baggage accompanying the returning tourist." That phrase does not cover, says the Toronto Star Weekly, accessories actually installed as part of his car and not carried as baggage, nor does it cover baggage which he might ship by train to avoid overcrowding his car.

### Have To Take Chance

A friend asked us yesterday how to make money on the stock market and the rule we gave him was so simple that maybe we can pass it along, says the Niagara Falls Review. One all needs to do is to buy when the stocks are low and sell out when they are high. Of course, we didn't presume to give our friend any rule about the certainty of knowing when stocks are low and when they are high. If we knew that secret we wouldn't be working so hard.

Some species of mayflies live only a day, mating and dying between sunrise and the next.  
"How is it your wife doesn't fidget with you all the time?"  
"There's no room for complaint."

### Has The Right Idea

Winnipeg Police Chief Suggests Way To Curb Auto Thieves

New methods of curbing automobile thievery were advocated by Police Chief George Smith, Winnipeg, at the annual convention of the Chief Constables' Association of Canada held in Montreal.

Chief Smith urged a law barring known criminals from getting auto licenses, another prohibiting short-wave radios in cars except on police permit, and a third compelling manufacturers to equip cars with governors that would not let them travel over 50 miles an hour.

Not only would his proposed measures check auto theft, Chief Smith said, but they would serve also to cut down general crime. "The automobile is used in practically every major crime," he told the association.

"We have found," he said, "that many criminals now have radios in their cars, and when the broadcast of a crime is given, they are away before the police can swing into action."

"We find also that nearly every criminal to-day drives an automobile. These fellows get a license without trouble, and I believe there should be a law prohibiting known criminals from obtaining licenses."

His suggestions were referred to the association's legislation committee for a report.

### Make Silk From Milk

German Chemist Residing In England, Produces Silk From Casein

Canada, known for decades as the "world's granary," may some day become a major producer of silk—synthetic silk from milk. But—and this is the important qualification—the cows must be fed a daily meal of mulberry leaves, diet of the silkworm.

The experiment already has passed through the slow and costly stages of research and been declared a success. For 10 years Benjamin Roos, 41-year-old German chemist now residing in London, has been working on the idea. He has spent £25,000 (roughly \$124,000) on his scheme, maintaining laboratories in four countries. Samples submitted to analysis have come so close to the standard of real silk it has been difficult to distinguish between them.

Roos, however, is not yet satisfied. He set an objective of trying to obtain five essentials—beauty of color, strength, softness, elasticity and non-shrinkability. At present he has succeeded in combining any four of these qualities, but the fifth has eluded him.

An average cow can produce enough casein daily to manufacture nearly two pounds, eight ounces of synthetic silk. It takes more than 30,000 silkworms, who will eat a ton of ripe mulberry leaves, to yield 12 pounds of raw silk.

### Interferes With Signals

Static Electricity Regarded As One Major Peril Of Aviation

Discovery that electricity, streaming out behind airplanes in flight, caused the static which broke off radio signals just before some of last winter's fatal air crashes, was announced to the American Association for the Advancement of Science at Denver.

Hanging a wire behind the plane promises to stop the static, which has been one of the major perils of aviation. It was reported. Heretofore this static has been attributed to the friction of dust, rain, snow or hail against a flying plane and its aerial.

These reports were made by H. M. Huckle, engineer in charge of the United Air Lines communication laboratory. They came from a flying laboratory, a regular twin-engine plane, fitted with special devices and manned by 10 scientists. The crew of static hunters spent three months, flying in the western portion of the United States. They hunted clouds, snow, rain and sleet.

They found, Huckle said, that static occurs only during certain weather conditions. They believe the static can be forecast the same as other weather dangers.

### Practical Suggestions

How To Avoid Sunstroke And Exhaustion From Heat

Some practical suggestions on how to ward off sunstroke and heat exhaustion are given by the Industrial Accidents Prevention Association. Persons should keep their skin clean, wear light, loose clothing, eat less meat and more vegetables, avoid strong alcoholic drinks, avoid loss of sleep, overfatigue and worry, and occasionally take a quarter teaspoon of table salt in a glass of water as a means of resisting heat, it is advised.

The hands of St. Paul's Cathedral clock were removed for the first time in 20 years so the mechanism could be inspected.

Television sets have 33 tube circuits.

The University of Naples, Italy, was founded in 1224.

### CHIEF SCOUT LEADS CHEERS FOR PRINCESS ROYAL

A special Coronation Scout and Guide rally was held at Wembley recently and was attended by the Princess Royal, King George's only sister, and Lord Baden-Powell, the Chief Scout. Our picture shows Lord Baden-Powell leading cheers for Princess Mary whilst she takes the salute at the march past.

### Queen Mary's Private Life

Is Not Fashioned On Dignity Required In Public

Though no Royal lady ever bore herself with greater dignity when occasion requires, Queen Mary, to whom the Empire's affectionate greetings have gone on her 70th anniversary, has no liking for rigid etiquette in private life.

There is a story of a housemaid, just promoted to the upper regions of Buckingham Palace, being taken about on hearing whistling in the corridor leading to Queen Mary's bedroom.

She was still more astonished on discovering that the whistler was the Queen herself.

As all who come in contact with her know, the Queen Mother has a keen sense of humour and a gift of genuine laughter.

It was Keir Hardie—no flatterer of Royalty—who once declared that Her Majesty's was the most cheerful laugh he had ever heard.—News of the World.

### Works With Mirror

Toronto Dentist Pulls And Fills His Own Teeth

Dr. S. M. R. Toronto, (he would not permit any more of his name to be used), knows what it is to hear himself say, "This will hurt just a little." For the dentist pulls and fills his own teeth. "It's all done with mirrors," he explained. "It was a little awkward at first—especially with back molars. But I think I can make as good a job of my own teeth as any other dentist. It's cheaper, too! I have been doing my own work for years!"

Dr. S. M. R. paused to grind at his tooth, keeping his eyes on his work by means of a mirror on a cabinet. A clean, neat "crow's foot" and then came the silver filling and the job was finished.

### He Proved It

It was a dark and stormy night when the weary husband returned home.

"I've been to every shop in town, and they can't match that bit of ribbon for you anywhere, dear," he said to his wife.

"Splendid!" she cried. "I just wanted to make sure that it really was unique."

Salt is produced from the 400-foot deep mines in Cheshire at the rate of more than 1,000,000 tons a year.

### Embroider Her in Wool or Silk

Household Art by Alice Brooks. She's Done Entirely in Single Stitch. A soft pillow, or living up a picture for the kiddies' room? Stitch her fluffy outlines in woolly yarn or angora, and see how lifelike Miss Pussy appears. A charming motif that "goes" very quickly, and is grand as a bit of pick-up work for odd moments. Send for the easy pattern, and plan your color scheme to-day! In pattern 5805 you will find a transfer pattern of a cat 9", x 12", inches, a color chart and key, material requirements, illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Unit, 476 McDermott Ave., Winnipeg.

### Cow Takes Prize

Captures Ayrshire Breeders' Association Meritorious Production Gold Medal Certificate

Picken's Patty, an Ayrshire-cow owned by the Consolidated Mining and Smelting Company of Canada, at Trail, B.C., has won the 18th Canadian Ayrshire Breeders' Association meritorious production gold medal-certificate for cows giving more than 100,000 pounds of milk during their lifetime production. It was announced.

The cow, also awarded the 18th Canadian membership in the select Hundred Thousand Pound Club of the American Ayrshire Breeders' Association, has produced 106,422 pounds of milk, 4,239 pounds butterfat in six lactations, or 2,130 milking days. Her average production was 17,736 pounds milk, 706 pounds butterfat per lactation, "a really remarkable record for any cow," the association announcement said.

### Move Against Cancer

Form National Society For Study And Control Of Disease

Council of the Canadian Medical Association has launched a movement to initiate a national society for study and control of cancer in Canada, passed a resolution urging compulsory pasteurization of milk throughout the nation and voted to associate itself with the Royal College of Physicians and Surgeons in setting qualification standards for specialists.

The move against cancer developed after the association tendered its good offices to trustees of the King George V silver jubilee cancer fund and offered to approach leading citizens of Canada in bringing about formation of the national society, it was explained.

To help the association effect this development, requisite funds have been made available from the King George cancer fund, Dr. Harvey Agnew, Toronto, said.

### Measuring Time

In measuring time on earth, we have several natural units. One is the time required by the earth to turn on its axis, or the day. Another is the time the earth takes to travel around the sun, or the year, and a third is the time between successive appearances of the moon in the same phase, or the month.

Hawaii is greatly increasing its appropriations for education.

## Dominion Proposals For Joint Youth Training Plan With Aid Of Provinces

### National Parks In Western Canada

Twelve Thousand Square Miles Set Aside As Playgrounds

To the Canadian Rockies and other scenic areas of Canada's great West come thousands of tourists each year from all parts of the world to enjoy the exceptional opportunities offered for rest and recreation. In these vast regions the Government of Canada has set aside in National Parks more than 12,000 square miles as playgrounds where all may journey close to nature but with the comforts and amenities of modern civilization. It is one of the chief charms of the Rockies that one may travel through the very heart of the region by luxurious trains or motor cars and find accommodation to suit almost every pocket-book, yet half an hour's walk from the railway or motor road Nature is found as wild, as solitary and as beautiful as it was a century ago.

There are thirteen National Parks in Western Canada—nine scenic parks and four animal parks. Like the recreational and historic parks situated in the eastern part of the Dominion, they are administered by the Dominion Government through the National Parks Bureau of the Lands, Parks and Forests Branch of the Department of Mines and Resources. Eternal vigilance is exercised to preserve the beauty and grandeur of the forests from the dangers of fire, and to safeguard the rich heritage of wild life within the park boundaries. By the construction of good roads and the provision of other modern conveniences of travel not only is the purpose for which the National Parks were set aside being realized, but the greatest possible enjoyment of these great natural treasure houses is afforded both the citizens of Canada and the visitors within her gates.

With the exception of Glacier National Park, on the summit of the Selkirk range in southeastern British Columbia, reached only by rail, all National Parks in Western Canada are accessible by automobile.

### Home Safety Education

Problem In Connection With Prevention Of Accidents

If a proper understanding has to be reached of the educational problem in connection with prevention of accidents in the home, more attention will have to be paid to the psychology of the general indifference to home safety education, Dr. N. L. Burnette, Ottawa, told the convention of the Canadian Public Health Association.

Dr. Burnette's observations related to a paper presented by Miss Yvonne Baudry, of the vital statistics branch of the Dominion bureau of statistics. The document covered the circumstances of accidental deaths in Canada in 1936.

Marked differences between the sexes in the incidence of accidental deaths were noted, said Miss Baudry. Moreover, early periods of life had certain forms of accidents characterized more than any other. An important class in the death of infants was that of suffocation by overlying. Between the first and fifth years, children were exposed to dangers from burns and acids, to drownings in the course of their play and to vehicular accidents. These latter occurred owing to the child's lack of sense of danger "and perhaps the carelessness of those who should have guarded them," said Miss Baudry.

Boys had a larger mortality rate from accidents than girls between the fifth and 15th birthdays, owing to their greater recklessness and as a result more hazardous activities in which they engage. In adult life industrial accidents played a considerable part, as well as traffic accidents and drownings.

Many, in old age deaths occurred, which had to be attributed to violence, but in which the fragility of the decedent was largely responsible.

### Nothing Was Overlooked

Tailor Service Supplied In Abbey On Coronation Day

In many respects, the details of the Coronation Day organization at the Abbey were superbly efficient, reports the London Daily Sketch. Take the case of a certain peer who found, just after he had won his way to his seat, that he had torn his robe. He confided his ill-luck to his neighbor. "Don't worry about that," said the other fellow. "Just go up to the triforium. They'll look after you."

So the peer went to the triforium and there he found a tailor in waiting. In no time the peer's outfit was as good as new. He thanked the tailor, and apologized for giving him trouble. "That's nothing, my lord," the tailor replied. "You're the sixth I've fixed up this morning."

Reputedly the world's loudest noise in modern times was the eruption of the volcano Krakatoa on an island in the Indian Ocean in 1883. The roar was heard 3,000 miles away.

The salary of London's lord mayor, which had been fixed at \$50,000 since 1875, has been raised to \$75,000.

Although none of the provinces have as yet signed agreements with the Dominion for the proposed joint youth training scheme, a number have indicated their intention of participating, according to a statement issued by the national employment commission.

At the last session of parliament a vote of \$100,000 was approved for this purpose. At that time Labor Minister Norman Rogers indicated this would perhaps be only preliminary to some more elaborate measure. "In all that we seek to do under this vote," the minister said, "we are going to try to secure a proper sense of direction through which we may be able later, if necessity should continue, to concentrate our efforts upon particular measures of re-establishment."

Letters were written by the minister to all provincial premiers advising them of the \$100,000 appropriation by parliament and informing them the Dominion government would contribute on a dollar-for-dollar basis in training projects for unemployed young people.

Subsequently, on suggestion of the minister, arrangements were made for members of the national advisory committee of the commission to cooperate with the provincial governments and discuss with them plans for youth development and training within the field outlined by the Dominion government.

Object of the move is to place young men and women in a position to take advantage of any employment that may offer, and to occupy them in the meantime in a manner that will improve their ability to earn, maintain their physical fitness and improve their morale.

There are four categories of effort planned, described in the statement of the commission as follows:

"First, training courses which will not only give occupation to unemployed youth, but will increase their employability.  
Second, short term learnership courses designed to give certain amount of training while engaged in specific employment. These learnership courses should not be confused with apprenticeship training. They will not exceed one year in duration, and are designed to assist the semi-skilled and unskilled worker to be better qualified to meet employment requirements. Especially is this need apparent in mass production industries.

"Third, work projects, such as forest conservation, designed to recondition youth, restoring morale, and at the same time conserving Canada's natural resources.

"Fourth, physical training projects for young unemployed to assist in developing and maintaining health, pending employment."

### Times Have Changed

No Accommodation For Horse, When The Cowboy Comes To Town

A cucumber came drifting into High River last week. His sturdy roan horse showed signs of long travel, for the horseman had just completed an arduous trip into the town from a ranch away out in the foothills 30 miles west.

Naturally, the rider's first move was to inquire of a stranger the location of the nearest livery stable. "Livery stable?" mused the town resident, and subsequent investigation revealed that there was not a single livery stable left in High River.

Tragely was averted by accommodation the weary horse for the night in a small private barn behind a local residence.

But what has happened to the wild and woolly west when even High River—second only to Calgary as a cowtown in years past—cannot boast a single livery stable?

The wild west has certainly tamed down a lot when a "cucumber" can't even find a night's lodgings for his horse. The gasoline filling station has evidently usurped the place of the last fragrant livery stable, and the west of the pioneers is fast becoming a thing of memory.—Calgary Albertan.

### China's First Paper Mill

China's first paper mill and wood pulp plant combined has just been opened near Canton. It was designed, constructed and equipped by Swedish architects, engineers, and manufacturers. A Swedish engineer and two Swedish foremen head the mill, but the workers are all Chinese.

### Keeping Stamp Collection

Rumors regarding the disposition of the late King George V's valuable stamp collection have been set at rest; King George VI will keep the collection and add to it. The 200 or more albums containing many rare and expensive specimens are valued at \$500,000 (\$2,470,000).

Aldous Huxley, the noted writer, recently remarked that he seldom took a complete holiday as he found that his health commenced to break down as soon as he stopped working.  
The higher you get in the evening, the lower you feel in the morning.

## No More Getting Up Nights NOX KIDNEY FLUSHERS

### Regulate The Kidneys and Liver

Thousands today are not enjoying good health because the kidneys or liver are not functioning as they should—two very important organs. If your liver is covered with bile, you have a bad taste in the mouth, tongue coated, breath foul, a bitter taste in the mouth, pain under the shoulder blade—so many symptoms are the outcome of a sluggish liver. If the kidneys or bladder are weak, the filters clogged, then uric acid and poison is thrown into the blood stream, causing rheumatism and sciatica, you see specks like stars appear in your eyes, there is a burning sensation, a pain in the back and limbs become weak—take Nox Kidney Flushers and see how quickly they all disappear. You may purchase Nox Kidney Flushers at

Sweet's Pharmacy, Lacombe

Each package contains one month's treatment. Price One Dollar.

## Chlgwell

**CHIGWELL.**—Mr. and Mrs. Cochlin and family have returned from Jarrow, where they have been spending their holidays. Mrs. Pete and Glen came back with them for a few weeks' visit.

Mr. and Mrs. Floyd Willson and family are spending a few days in the Bentley district.

Mr. and Mrs. Herron and son, Bobby have been holidaying in Edmonton.

Leonard Hill, who has just returned from Vancouver, is at present working in Chlgwell. Leonard believes there is no comparison between Alberta and B.C. in favor of Alberta, of course.

Quite a number of families from here attended the Lacombe Fair on Friday.

Robert McKay is at present in the Lacombe Hospital. We all wish him a speedy recovery.

Everyone is busy these days picking saskatoons. The berries are plentiful this year.

Robert Evans is spending a few days at Gull Lake.

Jimmy Mitchell is holidaying in Jasper this week.

Alaska was purchased by the U.S. from Russia.

## Storm Interferes with Lacombe Fair Friday

(Continued From Page One)

### BELGIANS

S. and W. Blakely of Red Deer took first in five classes, second in two classes and one third; also entered Champion Stallion and Champion Mare. There was no competition in this division.

### GRADE HORSES

Heavy draught, 1500 lbs. and over: Dry Mare or Gelding, 3 years and over—1 and 2, P. G. Morrison; 3, Roy Henderson.

Foal, 1937—1, Roy Henderson; 2, P. G. Morrison; 3, J. I. Woodrow. Brood Mare in foal or foal at side—1, J. I. Woodrow.

Filly or Gelding, 1 year and under—1, Alex C. Graham; 2, P. G. Morrison.

Filly or Gelding, 2 years and under—1, J. M. Douglas; 2, Alex May; 3, Roy Henderson.

Team purbred on grade, harnessed to wagon—1, P. G. Morrison.

**AGRICULTURAL PURPOSES**

Over 1900 lbs. and under 1999 lbs. Dry Mare or Gelding—1, P. G. Morrison; 2, J. M. Douglas; 3, P. G. Morrison.

Foal, 1937—1, E. Willis, Sylvan Lake; 2, A. C. Graham; 3, J. Roper.

Brood Mare in foal or foal at side—1, P. G. Morrison; 2, J. M. Douglas; 3, J. Roper.

Filly or Gelding, 1 year and under—1, A. C. Graham; 2, Vernon Gimbel; 3, Alex May.

Filly or Gelding, 2 years and under—1, J. W. Biglands; 2, P. G. Morrison; 3, E. Willis.

Team harnessed to wagon—1, P. G. Morrison; 2, J. M. Douglas; 3, Alex May.

**SADDLE PONY SPECIALS**

Class 1—1, Mary Ogilvie; 2, Roland Piersen; 3, Ivan Jones.

Class 2—1, Frank Langrock; 2, Mary Ogilvie; 3, Kathleen Mack, Clive.

Blakely Special—1, O. Young; 2, T. J. Alexander.

Jack Harvey Special—1, J. M. Douglas; 2, W. MacDonald; 3, W. E. Stewart.

Edward Specials—1 and 2, Roy Henderson; 3, J. I. Woodrow.

Brown Special—1, J. M. Southward; 2, W. Chester; 3, J. M. Douglas.

F. H. Reed Special—1, P. G. Morrison; 2, Alex Milne; 3, J. M. Douglas; 4, J. W. Biglands; 5, Vernon Gimbel.

Judge of the entire Horse Division—A. L. Dollar, High River.

### Cattle Division

#### SHORTHORNS

Bull, under 3 year—1 and male champion, E. Willis.

Cow, 3 years and over, milking or in calf—1 and female champion, W. Biglands; 2, Willis.

E. Willis was awarded all firsts except the one, which was won by J. W. Biglands.

#### HEREFORDS

Bull, under 1 year—1, A. G. Roper; 2, W. J. Edgar; 3, J. Roper.

Bull, 1 year and over—1 and male champion, W. J. Edgar; 2, Rex Saunders; 3, Rex Saunders.

Bull, 2 years and over—1, W. J. Edgar; 2, J. Roper.

Heifer, 1 year and over—1, W. J. Edgar; 2, Rex Saunders.

Heifer, 2 years and over—1, A. G. Roper; 2, J. Roper; 3, Rex Saunders.

#### HOLSTEINS

The champion male and female, and all firsts, were won by H. H. C. P. Elwell. A second and third in one division was awarded to J. I. Woodrow.

#### AYRSHIRES

J. J. Richards of Red Deer entered champion male and female and was awarded firsts in each of six classes. D. A. Boden of Lacombe won one first and two seconds.

Bank of Montreal Special—1, Allen Campbell; 2, Roy Henderson; 3, Vernon Gimbel; 4, Bruce Woodrow.

Judge of Cattle Division: W. D. McDonald.

### Swine Division

#### YORKSHIRE

Champion male and female won by J. M. Douglas.

Boar, under 1 year—1, J. M. Douglas; 2, Roy Henderson; 3, Arthur Kries.

Boar, under 1 year and over 6 months—1, J. M. Douglas.

Sow, 1 year and over—1, J. M. Douglas; 2, Roy Henderson; 3, Arthur Kries.

Sow, under 1 year and over 6 months—1, J. M. Douglas; 2, Arthur Kries.

Sow, under 6 months—1, Bill Jenkins; 2, Bill Jenkins; 3, Roy Henderson.

McKenzie Brothers' Special—1, Bill Jenkins; 2, Arthur Kries; 3, W. Milne; 4, Vernon Milne.

Judge of Swine Division: M. L. Freng.

### Sheep Division

#### HAMPSHIRE

Champion Ram and first won by W. N. Flewelling.

First and grand champion male and female won by A. Boden.

Ram Lamb—1, E. D. Boden; 2, Phyllis Jenkins, Gull Lake.

Ewe, 1 year and over—1 and 2, D. Boden; 3, Phyllis Jenkins.

Royal Bank Special—1 and 2, Phyllis Jenkins; 3, 4, Wilma Flewelling; 5 and 6, George Flewelling; 7, Jack Darroch; 8, Jack Kirkpatrick; 9, Lillian Day; 10, Margaret Day; 11, Vernon Gimbel.

Judge of Sheep Division: M. L. Freng.

### OLD THEORY IS UPSET

Mother, to Small Daughter: "Look, puss is washing his face."

Small Daughter: "No, he's washing his hands and drying them on his face."

## Clive

**CLIVE.**—There was considerable hail damage near the highway south of town on Friday last but no hail fell near Clive, although one-sixth of an inch of rain, accompanied by a violent wind, swept the town.

Mrs. G. G. Vandervoort is erecting a building which will be used for a tea room, on one of the hotel lots. A. L. Morrieal has moved his house on to a new foundation near the road. It is also building.

Mrs. H. B. Scott and Mrs. Grace Jaynes are spending this week at the Scott castle, Sylvan Lake.

Walter Longstreet and Harry Williams, Jr., are rooming for a few days at the Cozy, Gull Lake.

A few people from Clive attended the Lacombe Fair on Friday, and many attended the Hell Drivers' exhibition in Red Deer on Wednesday, July 28.

From South Dakota

L. Wagner had a visitor from South Dakota, who stayed a few days, en route to Jasper.

Mrs. Melvin was visited by her daughter and husband from Edmonton over the week-end.

Mess Nellie Heald has just returned from Stettler, where she has been visiting.

Mr. and Mrs. G. Stanchfield and family spent Sunday at the home of Mrs. Stanchfield's parents, Mr. and Mrs. A. Heald.

Miss Margery Nesbitt returned home from visiting her sister, Florence E. Nesbitt, and friends in Lacombe.

The Searle Grain Company is making repairs to its elevator here. The 11-ton scale is being replaced by a 15-ton scale, the driveway is being enlarged and a new office is being built.

## Tees Tattle Tales

By TATTLE

**TEES.**—Mrs. Fred Meadows and son are spending a short vacation with her mother, Mrs. Montgomery.

The rain and hail on Saturday did damage from 5 to 10 per cent in places to crops, besides halting hay operations. It is with deep thanks that no more hail was in the clouds than that which fell as it was accompanied by an 80-mile gale and would have cut everything clean.

Mrs. Holebrook is spending a holiday with her daughter, Mrs. Ken McDougall.

Mr. Colebrook returned from Hughenden, Mrs. G. Fry from Stanmore and Tom Cunningham and family from Bow.

All are pleased to be back where the sun shines and the rain falls.

William Bright is now spending his holidays before the rush starts this fall.

Miss Lillian Gogberg left with her mother Tuesday morning for Red Deer to have her tonsils removed. The district wishes her speedy recovery.

**TORONTO.**—Forty per cent of all deaths in Toronto in 1936 were due to the so-called degenerative diseases of life—heart, kidneys, and arteries, a total of 2861.

Many of the best riders in Canada, among them some who were prize winners at the Calgary Stampede, took part in the events, which played some of the finest bucking horse contests of the province.

Large crowds gathered both Wednesday and Thursday. A record crowd was reported at the "big time" dance which followed the program.

**The Prize List**

Results in the junior stock show, with exhibits under one year, all entries made by boys and girls between the ages of 9 and 15 years, were as follows:

Purebred beef: 1, Thomas Mellis; 2, John Grinde; 3, John Grinde; 4, Harry Whitesell.

Purebred beef: 1, Annie Diggle; 2, Harry Diggle; 3, John Grinde; 4, Harry Whitesell.

Grade dairy: 1, Peggy Diggle; 2, John Grinde; 3, Harry Whitesell; 4, John Grinde; 5, Carl Bakke; 6, Thomas Mellis; 7, Harry Whitesell; 8, Billy Chiles.

Swine Club: 1, Walter Langmuir; 2, Harold Hayden; 3, Layton Layton; 4, Thomas Mellis; 5, Robert Langmuir; 6, for Langmuir; 7, Robert Hayden; 8, John Whitesell; 9, John Grinde; 10, Bruce Watts; 11, Harriet Watts; 12, Doris Watts; 13, Harry Whitesell.

Girls' bicycle race: 1, Enid Roper; 2, Louise Anderson.

H. E. Wilson of the Dominion Experimental Farm at Lacombe was in charge of beef and colt judging.

F. H. Newcombe judged the swine. All exhibits were of an outstanding class and received much favorable comment from officials and spectators at the show.

Judging was done on the Agricultural Society's grounds on the morning of the first day.

## Sunny Crest Specs

**SUNNY CREST.**—Those who attended the vacation school from our district here Johnny and Raymond Fisher, Edith Miller, Fay Saunders, Marion Gee; Rose, Arthur and Hazel Woods. The work they did was very nice. Keith Powers helped Mr. Mundy with the boys' wood work.

Mrs. Powers visited with her daughter Elsie in Edmonton last week.

Some of the folks in our district saw the Hell Drivers in Red Deer and reported there was some fancy driving that day.

Mr. and Mrs. J. Pattullo of Edmonton are giving demonstration dinners in the neighborhood to show the super-henry cooking utensils and tell the value of better cooking methods. A very successful dinner was held at the home of Mrs. J. Bradley last Thursday.

The hostess invited half a dozen people to her home and Mrs. Pattullo does the cooking.

A large grey pelican was seen near Gull Lake last week. Old timers say they are rarely seen.

## Session at Canadian Junior College Closes

A ten-day session of the Alberta Conference of Seventh-day Adventists held at Lacombe closed Sunday, July 26.

Pastor H. L. Rudy of Calgary was re-elected president of the Alberta Conference of Seventh-day Adventists in their annual camp meeting here. Other officers to serve with him during the ensuing biennial period are:

G. L. Sather, Calgary, secretary; E. J. Westman, Calgary, treasurer; E. E. Farnsworth, Calgary, financial secretary; H. L. Rudy, Calgary, Religious Liberty secretary; Anna Nickel, Calgary, Sabbath School secretary.

Executive committee: Pastors H. L. Rudy, G. L. Sather, E. J. Westman, Calgary; E. E. Farnsworth, Cassils; Professor W. L. Cobb, Pastor J. D. Neufeld, Lacombe, and E. C. Scott, Mannville, Alta.

**Future Policies**

Recommendations outlining future policies for their educational and religious liberty work were adopted by the delegates. It was also voted that the denomination establish more private schools in connection with its churches for the education of its children.

A resolution passed that "This session of the Alberta Conference officials of Canada and the province of Alberta our grave alarm over recent developments and our deep concern that there be no uniting of church and state in Canada for the oppression of minorities."

After considering the proposed calendar reform it was voted "That as Seventh-day Adventists we place ourselves on record as being opposed on religious grounds to the proposed changes in the calendar."

**Guest Speakers**

Among the guest speakers were: Pastor W. H. Berghuis, retired missionary from the Philippine Islands; H. G. Wells and H. O. Olson from Washington, D. C., world headquarters for the denomination; F. W. Hunter, missionary on furlough from India, and W. Mueller, from Central Europe; W. B. Ochs, president of the Canadian Union Conference of S.D.A.; L. E. Christman, A. Clark and C. W. Dugger from Winnipeg, and C. G. Maracle from Oshawa, Ont.

**The Churches**

**CHURCH OF ENGLAND IN CANADA**

Incumbent: The Rev. W. E. Herbert Licensay, Lay Readers: E. B. Jones, K.C., and A. T. Inskip.

Organist: Miss Alice Inskip.

Sunday, August 8—11th Sunday After Trinity.

10:00 a.m.—Sunday School.

11:00 a.m.—Matins.

7:30 p.m.—Evensong and sermon.

Monday—Cubs will meet in St. Cyprian's Hall at 7:30 p.m.

Tuesday—Scouts will meet at 7:30 p.m.

Thursday—Choir practice at 8:15 p.m.

**ST. ANDREW'S UNITED CHURCH**

Services at 11 a.m. and 7:30 p.m. Dr. Stanley Scott, B.A., B.D., Ph.D., of Viking, Alta., will conduct both morning and evening services.

**CHRISTIAN SCIENCE**

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "Spirit." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Then Paul stood in the midst of Mars' hill, and said, Ye men of Athens, I perceive that in all things ye are too superstitious. For as I passed by, and beheld your devotions, I found an altar with this inscription, TO THE UNKNOWN GOD. Whom therefore ye ignorantly worship, him declare I unto you" (Acts 17:22, 23). One of the correlative passages from "Science and Health with a Key to the Scriptures" by Mary Baker Eddy, is as follows (page 481): "Material sense never helps mortals to understand Spirit. God, through spiritual sense only, man comprehends and loves Deity."

**OF COURSE!**

"Haven't I seen you somewhere?"

"Believe you have—I've been there."

## Bentley

**BENTLEY.**—Miss Edna Evernden, who is nursing at the General Hospital, Calgary, is spending a three week holiday with her parents, Mr. and Mrs. J. G. Evernden.

Miss Loretta Willis spent a week with her cousin, Mrs. Carl Haastad, of the Stephenson district.

William Card of Ponoka and Clarence Eklund of Bentley left by motor on Sunday, July 27th, for a two week's vacation in Banff and different parts of British Columbia.

Miss Pearl Willis spent a week with her uncle, H. Willis of Halkirk. She returned home on Thursday accompanied by her sister, Miss Bernice and Marjorie, who have been enjoying a short holiday with their grandmother, Mrs. Roberts. They were accompanied by Frank Roberts, who has been visiting his sister, Mrs. Withersell, for the past week.

The Misses Phyllis and Marjorie Garnet of Calgary are visiting their grandparents, Mr. and Mrs. F. W. Thorp.

**New Arrivals**

Births at the Bentley Hospital during the past week were:

To Mr. and Mrs. F. Takken of Eekville on July 28, a son; to Mr. and Mrs. R. Mason, Eekville, July 29, a son; to Mr. and Mrs. A. R. Schrader, Rimbey, on August 1, a daughter.

**COINCIDENCE**

"What are you planning to do after you graduate?"

"I'm going to learn my dad's business from the ground up."

"I'm not going to work either."

**COINCIDENCE**

"I'm going to learn my dad's business from the ground up."

WORLD HAPPENINGS  
BRIEFLY TOLD

An earthquake which witnesses said cracked strong walls and turned crosses on church bellies shook the coast of Peru recently.

Russian Cosacks, former members of the White-Russian armies, who took refuge in the Central European countries, have organized a circus troupe to earn a living.

The United States agriculture department estimated world wheat production, exclusively of Russia and China, would increase approximately 800,000,000 bushels over last year's output.

Toronto city council approved a proposal calling for daylight delivery of milk. Under the new bylaw no milk shall be delivered between 7 p.m. and 6:30 a.m. of the next day between Oct. 1 and May 1.

The silver mace of the old Irish House of Commons was sold at auction in London for £3,100 (\$15,345). L. C. Honham, acting for a Dublin bank, was the successful bidder in the auction held at Christie's.

The Duke of Kent saw his great-grandmother portrayed on the stage when he and the duchess attended the first performance in England of Laurence Houseman's "Victoria Regina." Pamela Stanley portrayed the queen.

No daily flights with both passengers and mail will be made on the Trans-Canada airway until 1933. J. A. Wilson, controller of civil aviation, announced at a luncheon meeting of the Canadian Flying Club Association, held in Regina.

Sir John Simon, chancellor of the exchequer, announced to the House of Commons Great Britain does not intend to repave war debt discussions with the United States in connection with pending proposals for an Anglo-American trade agreement.

## Interesting Comparisons

Between Speed To-Day And That Of 40 Years Ago

The world was moving at a fast pace in 1893. C. W. Warren made some interesting comparisons in "The Story of the Railroad," published that year.

The ox teams of Russell, Major & Co., taking supplies to the army in Utah, less than a century ago, spent 20 to 30 days dragging the wagons from the Missouri river to Fort Kearney, 300 miles.

Mark Twain, travelling by stagecoach at a "brisk and furious gallop," recorded the 300 miles from St. Joseph to Fort Kearney was made in 56 hours. John Butterfield's first transcontinental stage line, following a long overland route to avoid winter snows, carried mail from St. Louis to San Francisco in 25 days.

Then came the pony express, that one time carried news from St. Joseph to Sacramento in seven days and 17 hours. The telegraph knocked it out after a few months of heroic service.

Soon followed the railroad, and an early traveller records his amazement that the 300 miles from Omaha to the crossing of the North Platte was made in 18 hours and 40 minutes.

The book of 1898 closes the record by noting that the "fort-travelled 300 miles" could then be made in six hours.

The modern, streamlined train schedules Omaha to North Platte in three hours and 55 minutes.

Meanwhile a regular passenger air liner has made a trip from Denver to Chicago in four hours and 16 minutes. Within the memory of our 7,000 surviving civil war veterans, Denver was more remote from Chicago than is Samarkand to-day—Chicago Daily News.

## Supply Exceeded Demand

Bride Worried Because Ice Cubes Fused Too Fast

A frantic bride called the Rochester Gas and Electric Corporation to complain that her new refrigerator "freezes ice cubes too fast."

Jack Sharkey, sales supervisor, said an electrician rushed to the scene and found ice cubes piled in every available pan, scattered all over the kitchen floor.

"I thought you had to take them out as soon as they froze," the bride told the electrician.

## As They Saw It

The following was the verdict by an Iowa jury in a suit against a railroad company:

"If the train had run as it should have run; if the bell had rung as it should have rung; if the whistle had blown as it should have blown; both of which it did neither, the cow would not have been injured when she was killed."—C.N. Railways Magazine.

Britain's wealth is estimated to be \$40,000,000,000. The average man's share is represented by the last 10 figures.

"Well, here's the same tramp I gave some pie to yesterday!" "Ah," said her husband, "they've hardened, these tramps."

Butterflies and bees with long tongues usually avoid the simple tongues of flowers, where crowds of insects are visiting.

## Became Star Salesman

Man Who Lost Part of Brain Made Success of Business

The case of an unsuccessful Chicago stockbroker who became a millionaire soon after a radical operation on the thinking centre of his brain, in which about three-quarters of his left frontal lobe had been removed, was described before the annual meeting of the American Medical Association by Dr. Ward C. Halstead, University of Chicago neurologist.

Mental tests for two years after the operation, Dr. Halstead reported, showed that the man had greater persistence, greater optimism and self-confidence and a lack of tendency to worry. On the other hand, the neurologist reported, the post-operative tests showed also a deterioration of the intellectual functions, particularly in the faculty of discrimination.

The stockbroker's wife told the physician that the only difference she observed in her husband after the operation was that he did not find fault as much with petty details, stopped worrying about the house and "can't drink as much as he used to without going haywire."

Before the operation, Dr. Halstead reported, the man had been deteriorating rapidly and had fallen in business. After removal of the frontal lobe he seemed to go through a period of insanity from which he recovered sufficiently to be discharged from the hospital.

The next heard from him was that he was managing a gold mine. This venture failed, "through no fault of his." He then "talked himself into a job as salesman for a line of goods of which he knew nothing."

In his first week, Dr. Halstead reported, his sales amounted to a quarter of a million dollars, the biggest business ever obtained in a week by that particular company. His sales kept mounting until the company had to expand its plant and he was made vice-president.

Independent of the clinical and social recovery, the report said, a "marked residual defect was noted, particularly in the so-called higher processes."

For example, one of the mental tests given by Dr. Halstead consisted in giving the "semi-brained" millionaire the task of crossing out each letter "o" from the pages of a book. The normal, well-brained person, tests have shown, would soon get fatigued and would stop after doing, at most, five pages. The millionaire was still going strong after he had done fifteen pages and continued until the book was taken away from him.

## Fruit From Australia

Apples And Pears Reached Eastern Canada In March

Just to give the inlander an idea of what Empire trade, a little enterprise and cheap freights will do, Montreal during the month of May, saw 10,000 cases of apples and 6,000 cases of fresh pears unloaded in the cases of fresh pears unloaded in the port from Australia. As far as is known, this is the first sizable shipment of fresh pears ever to reach Eastern Canada from Australia.

Starting first with the more robust apple, the importers now feel they are having the delicate pear, many thousands miles over the sea with success. These pears are picked in March, and the antipodean seasons being "upside down" to Canadians, they arrive on the market at a time so other places in the world are producing delicious fresh fruit. Montreal, Halifax and other towns on or close to seaports are aware of this fruit coming here. But inland importers might give this business a thought. People will pay very good prices for juicy, fresh, luscious fruit of this sort. There may be money in it for enterprising fruit importers—Canadian Business.

## British Settle Problem

Board Of Education Gives Sensible Report On Homework

Few problems have been more debated than that of homework for school children. As a consequence, foolish things have been said on both sides of the subject.

The British, in their characteristic way, have taken hold of the question, made it the subject of a report by the Board of Education—a report made out by teachers and inspectors. The report recommends that there should be no homework for elementary school children under 12, not more than one hour a day for those between 12 and 14, and 1½ hours for those between 14 and 16.

To the extent that it is possible to draw a line anywhere, this seems fairly sensible. It is not necessarily bad, of course, for a boy or girl to study in the home as well as in the classroom; sometimes, indeed, work done at home may be more valuable.

It largely depends on the total number of hours worked, and also on the age of the child.—Ottawa Journal.

## Greatly Surprised

Not so long ago motor cars in some parts of Ireland were few and far between. An old farmer was astonished when he saw one gliding along the road without any visible means of locomotion; but when a motor bike followed it round a bend in the road his eyes fairly bulged.

"Begob!" he remarked to his wife, "who'd a thought of that thing having a colt?"

## PURGE ROCKS RUSSIA

Bulldoze of the President of the Russian Soviet Republic, Alexander Chervakov, above, and wholesale arrests of hundreds of other prominent party members climaxed a series of treason trials designed to purge the Communist party of discordant factions.

## Witness Was Right

Judge Had To Apologize When Incredible Statement Was Proved

This story in the Calgary Albertian was taken from the files of the old Calgary Eye-Opener.

An aged and doddering gentleman was on the witness stand in a case involving the inheritance of a goodly and long-litigated estate. It was necessary that the fact of the existence or non-existence of other heirs than the old gentleman be established.

"Have you ever had any brothers or sisters?" asked the attorney who conducted the direct examination.

"I never had a sister," piped the old gentleman, "but I had one brother."

"Is that brother still living?"

"No, he is dead."

"When did he die?"

"About, about—let's see—it was about one hundred and fifty years ago."

"I asked you—you must have misunderstood me—I asked you when your brother died?"

"And I told you about a hundred and fifty years ago."

"The witness may have the right to set himself right, if possible, said the judge.

"Well, your honor, my father married when he was 17. A year later his wife bore him a child and died. The child died within three months. My father remained single until he was 72, then married a young woman to whom I was born a year later. I am now 98 years of age."

After profuse apologies the examination proceeded.

## Hold Pitching Contest

Australia's Pastime—Corresponds With Ploughing Meets In Canada

From far-away Australia comes a story of a pitching contest in which the winner tossed an eight-pound ball a distance of 50 feet. English farmers have their hedge trimming trials, the corn belt residents their humping competitions, and Canadians their ploughing meets. These tests of skill and endurance have their place in maintaining a friendly rivalry and a justifiable pride in work that is well done, and help to relieve the feeling of drudgery that is likely to be attached to everyday tasks.

## Gives Wealth To People

President Of Turkey Donates All Of His Property

Mustapha Kemal Ataturk, president of Turkey, donated to the people all his personal wealth, worth many millions of dollars, a London Daily Mail dispatch from Ankara, the Turkish capital, reported. Kemal Ataturk announced his action in a message to the National Assembly, the dispatch said. Lands, buildings, farms, estates and cattle were included, it was added. The assembly, in response, passed with cheers a vote of the nation's gratitude, the dispatch said.

## Idea Did Not Work

A confectioner in Belgrade left his dog to guard the shop while he went to lunch. When he returned, he saw a huge crowd gathered in front of his locked front door, gazing in at the window. They were watching a dog devouring box after box of chocolates. It was the watchdog.

## Had Ride On Camel

Amelia Earhart Putnam, American globe flier, and her navigator, Capt. Fred J. Noonan, inspected Karachi, the gateway to Northwest India, from the backs of camels while their \$50,000 "Flying Laboratory" monoplane was being overhauled.

Sir Henry Figg (to butler):—"James, the dog has ordered me to take more exercise. So in future I'll wind up my wrist watch myself."

The best throw that one can make with dice is to throw them away.

A sponger is a fellow who a position that won't hold water.

## Novelty in Europe

Great Geyser To Supply Electricity For Italy's Trains

A huge geyser will be harnessed within two years and its power used to operate electric trains, according to an announcement at Rome, Italy. Italians hail this scheme as a novelty in Europe; if not in the world.

The geyser, which started to belch steam a year ago after being bored to an unusual depth, is the most powerful of several which dot an area of 120 square miles in the district of Lardarello, in the province of Pisa.

With the intent of using this steam for industrial purposes in the same way that was done with other minisprings, the company which exploits the area had decided to turn this geyser to production of electric power.

In 1930, electricity will be produced on a still larger scale to drive railroad engines for the first time.

As a result of the existing plants is added to that expected from the new one, the company will be able to supply the state railroad with more than one-half milliard of kilowatt-hours yearly.

## Study Rheumatism

Survey Of Diseases Carried Out By Department Of Natural Health

A survey of rheumatic disease in Canada has been carried out by the department of national health working in co-operation with an insurance company, Dr. R. E. Woodhouse, deputy minister, told a meeting of the Canadian Public Health Association. The results of the survey will be published later.

"This survey has given us some definite information on the per cent of rheumatism by age and sex, the type of rheumatic disease by age and sex and the seasonal variety of the disease by severity," Dr. Woodhouse said.

"We believe the results will materially aid first the Canadian Rheumatic Disease Association and eventually the private practitioner in estimating various kinds of rheumatism."

## Making Permanent Records

Toronto Library Plans To Photograph Newspapers For Files

Because newspapers being handled will not last more than 75 years, Toronto Library is planning to have such records photographed so that they last forever. C. R. Sanderson, chief librarian, explained, citizens of the future who desire to see back files will be able to go to a booth and see the page or edition they desire projected on a screen. Each page of the newspaper will be placed on 16 mm or 35 mm film and a four-page paper will be photographed on five feet of film. Three weeks' newspapers will be placed on 100 feet of film. The system would permit many savings, the librarian stated.

## Lighting Bill Higher

Failure Of Moon Makes Hebrides Town Council Mad

The town council of Stornoway, The Hebrides, is mad at the moon. It hasn't shone lately, so the street lighting bill is 10 per cent.

Careful of their expenses, the Scots turn the street lights out when the moon shines bright on these northern islands.

Now the entire Hebrides are threatening to the following official announcement:

"The bad weather has deprived us of the use of the moon practically throughout the season."

Asia seems a long way off, but it's only thirty-six miles from North America—across the Behring Strait.

New Zealand has the lowest infant mortality rate of any country.

Those with nothing to say usually take too long to say it.

## BRITISH RIDER HAS SPECTACULAR CRASH

A brief statement by the Academy of Medicine of Toronto, prior to later official publication on the details of the research accomplished, said "it represents the most outstanding contribution in the history of silicosis research."

Doctors at the Banting Institute were reported to have found metallic aluminum particles protected rabbits' lungs from injury from quartz dust inhaled by the animals.

A Long-Lived Family

Queen Mary Inherits Health And Energy From Ancestors

George III. lived to be 67; his grandson, George III, saw his 81st year. The latter's son, Adolphus, Duke of Cambridge, was 76 when he died at Kew in 1850. The three children of this Duke lived 95, 94 and 64 years. The last was the Duchess of Kent, who was the mother of our Queen Mary.

With long-lived ancestors like these, it is not surprising that the Queen-Mother should be so healthy and hard-working on her 70th birthday.

Cleaning of York Minister in England is expected to require 4,500 scrub brushes, 6,700 pounds of soap, 720 pounds of pumice powder and 2,500 floor cloths.

A woman was charged with stealing a one dollar bill from a journalist. It is not known how the journalist got the bill.

Spills and thrills were the order of the day at the Harrington Speedway Stadium, London, recently when the New Cross riders beat Harrington in the first half of the National Trophy competition. Our picture shows the Evans, a New Cross rider, in a spectacular crash during the match. He was carried off on a stretcher, but soon recovered and later won another event.

## MAKE THIS MODEL AT HOME—BUTTONS ENHANCE ITS CHIC!

By Anne Adams

"Where there are bright buttons, there's chic," says Anne Adams, and one look at Pattern #444 will convince you that, as always, she's up to her eyes in fashion.

Pattern #444 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32 and 34. Size 16 takes 4 1/2 yards 36 inch fabric. Illustrated Step-by-Step Sewing Instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

## Paper Changes Hands

Amalgamation Of Daily Newspapers In Quebec City

Change of ownership of the Quebec Chronicle-Telegraph, evening daily newspaper, from Hon. Frank Carrel, M.L.C., to a syndicate of local businessmen is announced.

The announcement, published in the Chronicle-Telegraph, says this paper will hereafter be published with the Quebec News, a daily paper which ceased publication on May 29. The name of the merged papers will be the Quebec Chronicle-Telegraph, Quebec News and Quebec Gazette, representing amalgamations in the local English newspaper field since the founding of the Gazette in 1764.

Hon. Frank Carrel is a veteran Canadian newspaperman and has been an active journalist and publisher for 25 years. He inherited the Quebec Telegraph from his father, James Carrel, its founder. Mr. Carrel was born in Quebec in 1870 and was called to the Quebec legislative council in 1918.

Father—"Isn't it wonderful how little chicks get out of their shells?"

Son—"What gets me is how they get in."

The state of Florida has 3,751 miles of tidal coast line.

Those with nothing to say usually take too long to say it.

## Must Conform To Standard

Ice Cream Sold In Canada Is Subject To Inspection

Ice cream, may take an infinite variety of forms and colors, but it must conform to certain standards laid down by the Department of Agriculture if it is to be sold legally as ice cream.

Revised regulations governing this popular confection under the terms of the Dairy Industry Act have been announced at Ottawa. All ice cream sold in Canada is subject to inspection by government officers to determine whether it conforms to standards.

The small boy who risks a stomach ache by consuming innumerable ice cream cones at his Sunday school picnic may not know it, but ice cream is defined as a "frozen product made from milk products, with or without any of the following ingredients: eggs, water, sugar, harmless coloring, harmless coloring, and may contain added stabilizer composed of edible material to the extent of not more than one half of one per cent by weight."

The regulations further stipulate the ice cream must contain at least 35 per cent, by weight or food solids and not less than 13 per cent, by weight of milk fat. This milk fat minimum may be reduced to 11 per cent, if fruits, nuts, cakes or confections are used as ingredients for flavoring.

## The Newest Gadgets

Women Had Big Display At National Inventors' Congress

American women are making a strong bid for recognition in the field of invention. At the National Inventors' Congress held in New York more than 10 per cent of the new gadgets were entered by women.

Catherine M. Colburn of Albany, N.Y., decided one day that she was tired of asking her friends to hold a skein of yarn which she wound into a ball before beginning her knitting. She devised a yarn winder, which brought her an offer of \$23,000 for the patent rights.

Mary McDonough of Brooklyn slipped on a cake of soap in her bathtub about a year ago. The result was a sponge, so spongy that a cake of soap could be inserted in the middle producing a generous lather without danger of injury.

Tops in the gadgets on exhibit are presented by Isabelle Gilbert of Rochester, N.Y. Dimpleless girls go to be with her invention, which fastened on their face and wake up in the morning with dimpled cheeks and even a cleft chin.

## Last War Carrier Pigeon

Three-Wounded Bird Had Part In Argonne Drive

Mocker, three-wounded World War hero who helped smash the Hindenburg line, is dead at the age of 20 years. Last of the World War carrier pigeons, Mocker was stuffed, given a military funeral and sent to Army Signal Corps Headquarters at Washington to join his feathered buddies, Spike and Cher Ami, who died not long ago.

Mocker's big moment came on Sept. 2, 1918, when he carried a message from Beaumont giving American artillery the position of enemy batteries and enabling the doughboys to silence them in 20 minutes.

Struck by shrapnel, Mocker lost an eye, but was soon back and winging over the front again in the St. Michael and Argonne drives. He was wounded twice more but always managed to get back to his cote behind the American lines.

## Prevention Of Silicosis

A Possible Remedy For Costly Industrial Disease

Possible prevention of silicosis, costly industrial disease, was seen in research work done at the Banting Institute and the McIntyre mine at Schuchau, Ont.

A brief statement by the Academy of Medicine of Toronto, prior to later official publication on the details of the research accomplished, said "it represents the most outstanding contribution in the history of silicosis research."

Doctors at the Banting Institute were reported to have found metallic aluminum particles protected rabbits' lungs from injury from quartz dust inhaled by the animals.

## Odds And Ends

To-day I leave for the south of Nova Scotia. This part of the trip will include Halifax, the Annapolis Valley, and an Acadian community. This will take me finally to Digby, where I will take the boat across the Bay of Fundy to St. John, New Brunswick.

Northern Nova Scotia is characterized by its suitability for tourist trade. Much of the land is not suitable for industry or agriculture. This is the area of the greatest rural depopulation in Canada; about 60% in 50 years, although one out of four of Grey is not far behind with 46% in the same time. Most of the families are dependent on the land for some means of livelihood. They may have a farm, do some fishing, cut pulpwood in the winter, or have some of the boys may be in the mines.

There are better places to hitch-hike than Cape Breton, the light at this time. In a month there will be more American cars on the road than Canadian.

## Lloyd George To Sell Home

David Lloyd George has offered for sale his London home, Dwyfor House, Kensington. Now that he spends most of his time in Chert, Surrey, he finds Dwyfor House too large. When in London in future he will reside in a modern service flat.

If the juice it takes to run the 500,000-watt station, W.L.W., at Cincinnati, were paid for at the regular household rate, the electric bill would be more than \$1,000,000 a year.

**ASK FOR THE YELLOW BRIAR**

**KEEPS TEETH SPARKLING**

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VII.—Continued

"You are very backward, Paddy," he told me, "in your book learning. You are too talkative by far, and you are an annoyance to me in the school. I shall set you your tasks at home. You'd gain very little at the school, anyway. As well might I try coaxing the stars out of the sky into my hand, Paddy, as try prying sense into those dunder-heads."

The first care of a boylike me, he told me, should be to think and speak his thoughts clearly in the simple words of the English tongue. And to do that, the boy must know what his words mean and be the master of many of them.

"I will have no gable-guts about Whistling Hill," declared Old Hickory Mick. "Tighten up the belt of your tongue."

The master put me under a rigid discipline; and had great patience with me because he knew I was trying desperately to please him. Ten new fresh words a day—to taste them by rolling them on my tongue, to pronounce them aright, to know the precise shades of meaning, and to use them freely and naturally in conversation—that was my daily task. The whole matter is clear to me now. The human brain cannot rear without words. A man cannot pasture even on his own thoughts save with the use of words. In a year's time, I could quote almost every statement made by Christ on earth. I was learning English grammar, not by committing stupid rules to memory, but by hearing the language correctly spoken. I could, in time, labor through the stilted, crabbed editorials in the semi-weekly Globe newspaper; though I preferred greatly the new story of Dombey & Son, which was printed as a serial when not crowded out by other stupid matters. Little I was with Michael Hughes. I was carried on some way also into other things; and for a poor orphan boy, I have never felt that my education was sadly neglected.

"One does not get learning in a school for its own sweet sake," Michael told me one day, years afterward, as we were fishing in the creek for trout.

"All one gets there," he continued, "is merely the tools that enable the brain to work. Now I would have you observe," he told me, after a sharp look at his line, "that fishing for these little trout is a real education for any person, young or old. The fisherman, as you observe, gets a splendid training in patience and perseverance. At the same time, the mind is getting a rest and is recreating itself. [Take ahead, you little devil!]" And such an education is practical because its rewards become gross and palpable in the frying pan. [Quit wriggling, my little beauty!]"

"It is possible, Paddy," he told me, "for the human brain to be so crowded with facts and the trifling gear of knowledge that no space has been left there for sane thinking to be done. Some very learned men, Paddy, have brains like a jackdaw's nest."

And he may have had the soul of the matter in him.

"What is the use of much of this knowledge, anyway?" he asked me as he disemboweled a fat, juicy worm.

"The end of knowledge is to get understanding; and the end of all such getting is to realize, Paddy, that a poor mortal here below can never really know anything surely. We live, lad, among shadows, and our lives are compounded of our feelings and our hopes."

His was a quaint and curious character. He was neat and particular about his person; and for long spells, he would be very steady in his habits. For weeks at a time, the man's soul would romp like a laughing child on sunny hillside; and then suddenly it would betake itself off to lurk for days in gloomy caverns of dripping, chilling darkness. I got to know the signs that such a spell was coming on the man. First thing he would go off his food. Then he would stride in and out the house

## BLACKHEADS

Blackheads go quickly by a simple method that I will describe them. Get two ounces of peroxide powder from your druggist, rub this with a hot, wet cloth gently over the blackheads—and you will wonder where they have gone. Have a Hollywood complexion.

Poor Michael got a swallow of tea down him.

"And you will be up to your tricks again, too," Michael Hughes, she warned him. "But don't be coming back here disgracing a respectable public house!"

We bundled Michael up and drove him home. Mrs. Murphy slipped me a small flask as we were leaving.

"Don't let him smell it or it will sicken the man entirely," said she. "But put a few drops into his tea on the side like, to-day; it will help to numb the gnawing of his innards."

It was a miserable time the man had while his body was purging itself of the poisons; and Michael always came out of a debauch with a hunched heart and a chastened spirit. He consoled himself for a winter, ward by reading the Georgics of old Virgilus Maro, and wearied me with the sound of them.

In the course of my duties at Whistling Hill, I got to know a lot about this business of whiskey drinking. I am not, of course, referring to the steady, sedate, daily drinking of hard liquor, which becomes a regular habit with many men, some of whom live to a great age and go to their graves as respected, and successful members of their communities. A true history of the British Isles would demonstrate that every high office under the crown has been occupied, one time or another, by a gentleman who made a regular practice of consuming over twenty ounces of Scotch whiskey a day—generally in charge of armies in the field, judges of high appellate courts, prime ministers—it is necessary to name them? My concern was not with a man who took alcohol in such regular dosage that his body tolerated it as a food.

Michael Hughes was not a tippler. He never kept a drop of liquor about the house; and at ordinary times the very smell of it was unpleasant to his nostrils. The condition of his nerves seemed to create at intervals a craving which he fought for days, but which usually overcame him. Like a journeyman barber of to-day, he usually held out till Friday. And when he drank, he poured hard liquor down the quiver, and irritated nerves of a cross and empty stomach. A rebellion promptly broke out. In consequence, Michael Hughes was a drunkard; and in the end, he broke his neck by falling through an open trapdoor in a tavern.

He would have come to a sad end at an earlier date had Mrs. Murphy not given me some sound advice.

"Keep him away from here as long as you can," she urged. "When you see the fit coming on, dose a spoonful of brandy into his tea. That will give him a false appetite. Then feed him thick pease soup and kasha."

Which I still think was expert advice. And speaking of destructive and perverse habits and appetites, a fine young lady teacher in the same school section killed herself, years afterward, by eating sour pickles and chewing chalk.

(To Be Continued)

## Make Use Of Waste Gas

Can Convert Turner Valley Oil Into Fuel For Automobiles

Application of modern chemical knowledge can convert waste natural gas of Alberta's Turner Valley oil field into fuel for automobiles and other industrial products with consequent increased production value, Dr. A. Cameron, of the national research council, of Ottawa, said.

Dr. Cameron, addressing the Canadian Chemical Association's annual convention at Vancouver, said increasing demand for some of the products which can be derived from natural gas, and improvements in production processes, will "probably make such a development profitable in the near future."

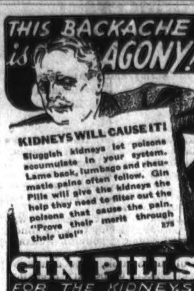

Only location of the field and restricted coal markets has made chemical processing of the gas at Turner Valley unprofitable to date, he said.

Isn't it true that a man is as big as the things that annoy him?

## RED CROSS MEN BUSY IN SPAIN

When aeroplanes bombed the suburbs of Barcelona recently the homes of the working class were the most severely damaged. Our picture shows a number of Red Cross men digging among the ruins for injured families.

**THIS BACKACHE IS AN AGONY**

**KIDNEYS WILL CAUSE IT**

Stagnant kidneys let poisons accumulate in your system. Lame back, headache and rheumatism result. Gin Pills will give you the kidneys that cause the pain. Prove their worth through their use.

**GIN PILLS FOR THE KIDNEYS**

## Study Of Obesity

Scientists Find That It Is Linked With Control Of Blood Sugar

Obesity was traced to the blood, and linked to a control of blood sugar by the pancreas, in a discovery reported to the American Association for the Advancement of Science.

The discovery came from experiments on white rats with a new form of insulin developed in Canada. It gave medical science for the first time an "obesity guinea pig," an animal on which experiments can be made to study the puzzles of overweight.

The rats got so obese they had difficulty rolling over. They got that way by over-eating voluntarily, like human beings, something no animal has done heretofore.

The discovery was announced by Dr. Eaton M. McKay and Richard H. Barnes of the Scripps Metabolic Institute, La Jolla, Calif.

For some years, they explained, doctors have reported cases of thin people putting on weight by taking insulin. These persons did not have diabetes.

The La Jolla scientists tried ordinary insulin on rats. There was never a gain in weight. Forced feeding did not work. Recently they tried the new remedy known as proinsulin zinc insulin, developed this year at Connaught laboratories, Toronto, Ont. It is made by adding to insulin a "protamine," a substance extracted from sperm of trout, and common zinc.

The effect is to slow down and extend the period of time during which insulin lowers the sugar in the blood. In rats it produced "removable" overweight, the report stated. The females gained more weight than the males.

## Have Not Had Success

Party From Germany Travel Far In Search For Work

Two men and a woman sailed into Capetown, South Africa, in their five-ton yawl, after an adventurous voyage from Germany, their food and water supply about exhausted. They are Frederick Brugsalis and his wife, and Heinz Matthes. Originally there were four, but one died of fever of the west coast. Their ship, the Stella Maria had travelled 12,000 miles. The party set out with the idea of finding work in foreign countries, but so far have been unsuccessful, although they have been away from their country since August 1, 1935. They stayed at Angola six months hunting big game.

## Taken At His Word

"Who has been monkeying with my private newspaper?" shouted the infuriated official, as he searched his desk.

The office boy appeared in the doorway, a cherubic grin on his face. "I saw Mr. Simpson writing a letter," he murmured.

"And who's Mr. Simpson?" "He's the man who cleans the window," replied the boy.

The official swung around in his chair. "Jimmy," he said, "we call men by their names in this office; no mistaking in this place, and don't forget it."

A few minutes later the boy's head appeared in the doorway. "Gentleman to see you, George," he said.

## Want International Park

Proposal Is Made In Respect To Part Of B.C. And The Yukon

President Roosevelt was represented as "very receptive" to a plan to make part of British Columbia and the Yukon into an international park and Skagway, Alaska, a free port. Under the project envisioned by Senator Lewis H. Swiftback of Washington and Delegate Anthony Dimond, of Alaska, the section of Canada dipping southwestward toward Skagway, Alaska, from Chilko Pass to the Chisana-White River Pass on the eastern border of Alaska would be made into an "international park."

For months the two have been considering the scheme to obtain from Canada sufficient land to provide an "inside route" for United States flyers between Skagway and the main body of Alaska. At present aviators must fly over Canadian soil, which involves international law, or skirt the rugged, glacier-bound coast—a hazardous undertaking in winter.

They explained by making the block of country an international playground citizens of the United States as well as Canada would have access to it, or could fly over it without customs restrictions.

In exchange for Canada's concession of land, the United States would, under proposal, make Skagway a free port, thus giving Canadians in adjacent Yukon free access to the sea without annoyance of present United States regulations.

## Discount Old Legends

Well-Known Story About Lady Godiva Does Not Escape

Coventry-to-day not only honors its most famous woman, Lady Godiva, but also "Peeping Tom," who was supposed to have been struck blind for peeping on her famous ride through the city's streets.

Lady Godiva herself has two statues in Coventry, one in the Guildhall, the other in the Great Hall. Hundreds of tourists to England visit the city to see the statue. "Peeping Tom" is also immortalized in Coventry, presumably as a bad example, with several effigies. These are each in a different part of the city, but all purport to mark the exact spot where he was struck blind.

Both Lady Godiva and "Peeping Tom" have come in for their share of debunking in recent years. It now turns out that the legend of "Peeping Tom" did not appear in the first story of the legend was added years later as an afterthought.

As for Lady Godiva, a Benedictine abbey founded by her in 1043 once gave proof of her existence. That, unfortunately, was destroyed by Henry VIII, and while most people still admit that she was a real person, they doubt she ever made the ride. No documentary evidence of it turned up until 150 years after her death, and since then, detractors say, are common in old folk traditions. Lady Godiva's name, the debunkers say, was attached to such a legend to do honor to her piety and goodness.

## Expert On Food Costs

Chicago Woman Leads League To Help People Select Goods

It was the family budget that set Mrs. Wilbur Fribley thinking. Before she started to budget she never knew where the money went, or what food prices really meant. But six months of studied spending opened her eyes.

That was in 1918. To-day, Mrs. Fribley wife of a Chicago dentist, is leading a national drive against practices and taxes that affect the family purse. Dealers and distributors of commodities go to her to find what the consumer thinks. Mrs. Fribley generally knows because she gets consumer sentiment from women's organizations everywhere.

As president of the Housewives' League she has visited almost every state. The league has no paid help, does not circulate propaganda, does not advocate or support housewives' strikes. The league is an enlargement of Mrs. Fribley's work for her own home.

"Our whole program is one of education," she explains. "We are helping housewives select their markets and their goods. We are raising public opinion on legislation affecting food costs."

## Not Interested In Stunt

A Kentucky woman who wants "to go over the falls in a rubber ball on the Canadian side some time during the warm weather," has written to the mayor's office in Hamilton, Ont. She added, "Please write in English as I don't know French." A secretary complied, tossing cold water on the proposed stunt.

## Oak Trees Planted

The king and representatives of the empire planted 40 oak trees in Windsor Great Park as a commemoration of the coronation. The king planted the first tree. Hon. Vincent Massey, high commissioner, acted for Canada and Dr. Davies for Newfoundland.

A flying instructor relates that a disillusioned skating novice was one of his most apt women pupils. She very quickly found her feet in the air.

The total number of dogs in Britain is about 3,000,000.

**The best Safety Insurance**

**... a set of Firestone TIRES**

Be sure you have good, safe tires on your car to protect yourself and loved ones. When it costs no more to have the best, put on Firestone tires—the kind which have been PROVED safest by the world's foremost racing drivers. Drive in to your local Firestone Dealer and let him equip your car now.

**Firestone**

## Tuberculosis Treatments

Levy System Of Payment For Care Of Patients Is Recommended

The Canadian Tuberculosis Association heard a report of its executive committee, which recommended levy systems of payment for care of tuberculosis patients as a policy leading to greater efficiency and "one of the important steps in eradicating tuberculosis."

The report said investigations had been held in parts of Canada into the desirability of introducing such a system with the object of obtaining more even distribution of costs of the disease.

It declared if such a plan were adopted "it will mean that all municipalities (in a province) will pay an equitable share of the costs and will avail themselves of the facilities for treatment to a greater extent than at present." The scheme, it said, "is a measure of true economy."

## Life Of Queen Victoria

Screen Play Ban Has Been Lifted In Britain

England was promised a Queen Victoria of the stage and screen for the first time.

An official ban on theatrical versions of her life was lifted on the eve of the 100th anniversary of her accession to the throne. One stage play and one motion picture based on her life were approved for presentation in England.

"Victoria Regina," Lawrence Houseman's play that starred Helen Hayes of New York, will have its initial performance in London, after a special performance before an audience of one, the lord chamberlain.

He was quoted as "satisfied" with the way the queen was represented in "Victoria Regina," but suggested two minor changes from the original.

The larger the mind, the more it is made up.

## Little Helps For This Week

I will arise and go to my Father. Luke 15:18.

O my God, my Father, hear And help me to believe; Weak and weary I draw near, Thy child O God receive. I so oft have gone astray, To the perfect Guide I flee, Thou wilt turn me not away, Thy love is pledged to me.

If thou hast fallen, arise and go to thy Father like the prodigal son and humbly say, "Father, I have sinned against heaven and before Thee and am now worthy to be called Thy son. Make me as one of Thy hired servants." And thy heavenly Father will do what the father in the parable did. It will not change his love for the sake of thy misdoings. It is a small thing for Him to forgive Thee if thou believe in Him, for His hand is not shortened that it cannot make thee fit to be saved.

## Man Won The Battle

Outstared Rattlesnake But Took 35 Minutes To Do It

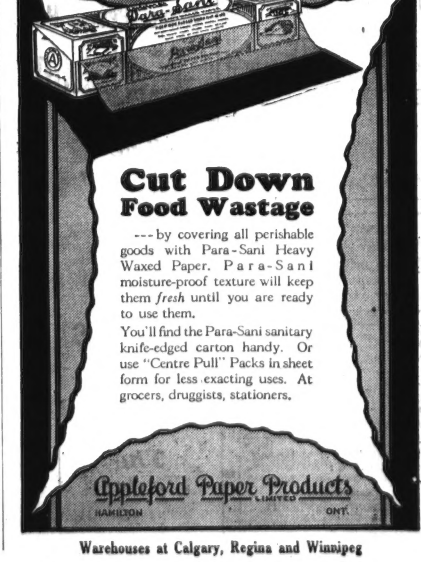

For 35 minutes a man's steel nerves and courage challenged a rattlesnake's instinct for dealing death to a moving object—and the man won the terrifying duel.

"The battle of stares" was won by Harold K. Whitford, 35, a district commissioner in charge of nature study for the Manhattan council of the Boy Scouts of America.

Whitford, studying bird life on Bear Mountain, New York, saw a three-foot timber rattlesnake two feet away. Whitford sat still. So did the snake.

After 35 minutes the snake started to slither away. Whitford lurled a rock and stunned the reptile. He will have it stuffed and added to his wild life collection.

The Queen Mary's rudder weighs 140 tons.

**Cut Down Food Wastage**

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

DRY SPELL IN ROMANIA.—Romania has been suffering from a long spell of dry, hot weather that has been shrivelling the grain and reducing the yield per acre. Last year this country produced 129 million bushels of wheat which provided an exportable surplus of some 35 million bushels.

### Aspen Beach

ASPEN BEACH.—The dance in Fernie's Hall on Saturday night was well attended and a most enjoyable time was spent. Jitney dancing was the order of the night and all were swinging to the snappy music.

Among the new arrivals at the Beach are:  
Mr. and Mrs. C. W. Smith and family, Calgary.  
Mrs. A. E. May and friends, Edmonton.  
Mr. and Mrs. LeMausier, Luseland, Sask.  
Mrs. East and friends, Ponoka.  
Mrs. J. Buchanan and daughters of Calgary.  
Mrs. F. W. Patterson and sons, Calgary.  
Rev. Dudley Kemp and family of Calgary.

Mrs. S. A. Archibald, Edmonton.  
Rev. Fawcett and family, Calgary.  
Mr. and Mrs. Bransett and family, Calgary.  
Mrs. J. Selock and family, Calgary.  
Mrs. J. Edgar, Edmonton.  
Dr. F. E. Newson, Edmonton.  
Mrs. N. E. Carlyle and family, Calgary.  
Dr. and Mrs. J. Richardson and family, Calgary.  
Mrs. C. A. Stuart, Calgary.  
Mrs. C. Hay, Calgary.  
Mrs. Upton, Calgary.  
Mrs. F. E. McLeod, Lacombe.  
Mrs. A. E. McDonald and family, Calgary.  
Mr. and Mrs. R. W. Ward and family, Calgary.  
Mr. F. Stappels and family, Calgary.  
Mrs. D. G. Millar and family, Edmonton.  
Mrs. Nickelson and family, Edmonton.  
Rev. W. Dalgleish and family, Clareholm.  
Mrs. C. S. Wallace and family, Edmonton.  
Mr. and Mrs. Edgar and family, Altx.  
Mr. and Mrs. Tiemstra and family, Barrihead.

**AMBITION**  
"What will you do when you grow up?" asked Tommy.  
"Oh," replied the tired Teddy, "I'll either join the sit-down strikers or tie up with the WPA."

Field Day and Conference Held at Lacombe Experimental Station; Officers Elected

Formation of an organization to be known as "The Hatchery Egg Producers' Association of Alberta," was effected on Wednesday, Aug. 4, at a largely attended Field Day and Conference of the Poultry Breeders of Alberta, held at the Lacombe Experimental Station.

Chairman of the Conference was G. M. Cormie, Poultry Commissioner, who, following a general welcome extended by F. H. Reed, Superintendent of the Station, gave a talk on several aspects of poultry breeding. Secretary of the meeting was Fred Higginson of Millet.

Following a report by K. V. Kapler of Strome, one of a committee of five appointed at a meeting last year to make investigations, in which he pointed out the distinct advantages to poultry breeders of having the weight and authority of an organized body to support their activities, a motion to form an association was passed unanimously.

The chairman appointed the following nonpartisan committee to bring in a slate of officers: Mrs. W. Huick, Strome; Mrs. J. Bird, Inisfail; Charles Ball, Inspector E. R. Nichols, Lethbridge; J. A. Bailey, C. I. Williams, R. A. Bell, Swallowell. Approximately 70 members registered immediately and paid the set fee of \$1.00.

**Recommendation Made**  
Following discussion, a resolution recommending to the executive that last year's price arrangements with the hatcheries be continued, if possible, was passed. As a partial covering of their expenses it was also decided to pay \$5.00 to each of the retiring committee, which was composed of D. Thornhill, Red Deer; H. Murgatroy, Inisfail; K. V. Kapler, Strome; George Borgal, Calgary; and H. H. Culbertson, Oda.

The slate of officers as passed by the convention was as follows:  
President, D. Thornhill, Red Deer; vice-president, K. V. Kapler, Strome; directors, H. Murgatroy, R. A. Bell, Douglas, Grannum; F. Higginson, Millet; Mrs. F. B. Stewart, Calgary; and Guy Armstrong, Fort Saskatchewan. This executive is empowered to select a secretary from outside the members of the board if found expedient.

Articles of a constitution, as drawn up by the retiring committee, were read and discussed clause by clause and given adoption by the convention.

Among those present at the Field Day were: I. O. Cunningham, Poultry Inspector; Dr. J. Redding of the Burns Company, Calgary; F. H. Newcombe, District Agriculturist, and J. Anderson of Red Deer, a prominent poultry breeder. In addition to representatives from all points between Edmonton and Calgary and towns east and west of Lacombe.

### Baptist Camp at McLaurin Beach Closes

(From Our Sunny Crest Correspondent)  
Sunday, August 1, was the last day of the Baptist Camp at McLaurin Beach, and those from the surrounding district who attended stated that this year's camp was the best ever. There prevailed over the camp a greater spiritual atmosphere than ever before. The guest speaker, Dr. A. S. Ingle of Vancouver, brought with him a "something" that he imparted to the whole camp. Mr. and Mrs. Archie Goring also contributed greatly to the spirit of the camp and those who attended the last two Sundays had a real treat listening to them.

### Spruceville

SPRUCEVILLE.—Mr. and Mrs. Milton Morier are rejoicing in the birth of a son, which occurred last Thursday. The little one's name is Charles.  
Mrs. Rice entertained Mr. and Mrs. Stout, Mr. and Mrs. Morley Bradley and Mr. and Mrs. Bill Mitchell of Lacombe last Sunday.  
Mr. and Mrs. H. E. Heath motored to Edmonton last week to attend a U.F.A. constituency convention at Partridge Hill.  
Mrs. Ed Stout and daughter left this district last week to join "Bill and Joe" Stout in Washington.  
The Chautauqua was very well attended last week at the evening performance. The Clive Players gave an excellent play, finely acted. Miss Florence Hall sang and the dances were well received.  
The Ladies' meeting was postponed last week owing to the Chautauqua and was held Wednesday at the home of Mrs. Crooker.  
The Lynstra family from north-west Edmonton are in the district for a week, visiting around the Dutch community.

### Heard at the Avalon

A travelogue was being shown on the screen at the local theatre recently and a talkative young man was chattering away to his lady: "When I come into my money, I'm going there," he said, "Another place I always wanted to go is—and I am also going"—he kept on, to the disgust of those sitting around him.

Finally a bored young man in front turned around and remarked in a loud voice: "All right, but why in h— don't you just go home, for now?"

### Will Attend Summer Extension Course

George W. Hotson will leave on Sunday for Saskatoon, where he will attend the Summer Extension Course of the Saskatchewan Optometric Association, to be held at the University of Saskatchewan, all next week, from August 9 to 14, inclusive.

The prominent lecturers will include: Dr. J. L. Jackson, M.A., M.B., Professor of Anatomy, Saskatchewan University, and Dr. Charles Sheard, Ph.D., Professor and Director of Biophysical Research, the Mayo Foundation, Rochester, Minn.

### Fire in Coal Bins Caught Before Any Damage Done

Spontaneous combustion was the cause of loss of a certain amount of the fifty tons of coal stored in the bin of the C.P.R. station here. Coal was removed in a smouldering state Monday morning, after the discovery of the smoking fire by George McIntyre, employee of the C.P.R.  
Too much slack in the coal was believed the cause of the fire, which was discovered before any great amount of damage was done.
